Teaching and Learning Online Franklin S. Allaire, Jennifer E. Killham, 2023-01-01 Science is unique among the disciplines since it is inherently hands on. However, the hands on nature of science instruction also makes it uniquely challenging when teaching in virtual environments. How do we as science teachers deliver high quality experiences to secondary students in an online environment that leads to age grade level appropriate science content knowledge and literacy but also collaborative experiences in the inquiry process and the nature of science? The expansion of online environments for education poses logistical and pedagogical challenges for early childhood and elementary science teachers and early learners. Despite digital media becoming more available and ubiquitous and increases in online spaces for teaching and learning (Killham et al 2014, Wong et al 2018), PreK-12 teachers consistently report feeling underprepared or overwhelmed by online learning environments (Molnar et al 2021, Seaman et al 2018). This is coupled with persistent challenges related to elementary teachers' lack of confidence and low science teaching self-efficacy (Brigido, Borrachero, Bermejo, Gunning, Duran, Duran 2004). Ideal for undergraduate teacher candidates, graduate students, teacher educators, classroom teachers, parents, and administrators, this book addresses why and how teachers use online environments to teach science content and work with elementary students through a research-based foundation.

War with the Gizmos Murray Leinster, 2019-06-27 The first battles began in the wilderness. The animals in the forests and glades struggled furiously for life and often fought with splendid courage. But they never won; they were always killed. And now it was man's turn.

Connected Minds Nicolas Payette, 2012-04-25 The theme for this volume is social cognition construed from a psychological and collective point of view. From the psychological point of view, the question is to understand how the human mind processes social information: how it encodes, stores, and uses it in the social context. From a collective point of view, the question is to understand how individual cognition is influenced, improved, increased, or impaired by social interactions for instance in communicating and collaborating with intelligent agents. These two dimensions of social cognition are obviously interdependent: the psychological dimension makes the collective dimension possible, which can in return modify the psychological dimension. The book is divided into four parts. The first part is about socio-cognitive skills. Among those, we count face recognition, imitation, learning, embodied social interaction, cheater detection, and psychological concept acquisition. The second part is about persons and memories: stereotypes, attraction, judgements, and impression formation are the subjects at hand. The third part is about understanding each other. A key part of that understanding is the motor system: whether or not we see it as a mirror, but community membership itself can also contribute to our understanding of others. The fourth and final part is about social cognition in societies. This section is unified by the common goal of understanding how social cognition actually influences the structure of different societies, whether whole cultures, specific social networks, rural communities, or even groups of caterpillars.

Samsung Galaxy Note For Dummies Dan Gookin, 2012-06-07 Use this friendly full color guide to make the most of the extraordinary Samsung Galaxy Note device.

The Samsung Galaxy Note is the first mobile device that successfully bridges the gap between a modern smartphone and a tablet. Nicknamed phablet, it has an array of features that could intimidate you without the help of this plain English guide. Dan Gookin shows you how to set up and configure the Galaxy Note and use the revolutionary S software that allows you to draw directly on the screen with the special stylus or S Pen. You'll also learn to use both phone and tablet features, get online and use the web, text, make calls, shoot photos, get GPS directions, and all the rest easily. The Galaxy Note is a revolutionary concept that combines smartphone and tablet technology; this guide demystifies the complex technology so you can take advantage of every feature. Shows how to set up and configure the device, work with the interface, and use the unique S software to write or draw directly on the touchscreen. Covers all the phone features, including voicemail and texting, as well as basic tablet features such as web browsing, e-mail, and social media. Explores how to use the camera, make notes, get directions, play music, synchronize, and share content, use apps, and more. Written by immensely popular author Dan Gookin, known for both technical expertise and his friendly, easily understood style, *Samsung Galaxy Note For Dummies* is just what you need to help you get up and running with your fabulous new phablet. Baudrillard, 2020-04-07 *The System of Objects* is a tour de force, a theoretical letter in a bottle tossed into the ocean in 1968 which brilliantly communicates to us all the live ideas of the day. Pressing Freudian and Saussurean categories into the service of a basically Marxist perspective, *The System of Objects* offers a cultural critique of the commodity in consumer society. Baudrillard classifies the everyday objects of the new technical order as functional, nonfunctional, and metafunctional. He contrasts modern and traditional functional objects, subjecting home furnishing and interior design to a celebrated semiological analysis. His treatment of nonfunctional or marginal objects focuses on antiques and the psychology of collecting, while the metafunctional category extends to the useless, the aberrant, and even the schizofunctional. Finally, Baudrillard deals at length with the implications of credit and advertising for the commodification of everyday life. *The System of Objects* is a tour de force of the materialist semiotics of the early Baudrillard, who emerges in retrospect as something of a lightning rod for all the live ideas of the day: Bataille's political economy of expenditure and Mauss's theory of the gift, Reisman's lonely crowd and the technological society of Jacques Ellul, the structuralism of Roland Barthes in *The System of Fashion*, Henri Lefebvre's work on the social construction of space, and last but not least, Guy Debord's situationist critique of the spectacle.

[Microeconomics](#) David Besanko, Ronald Braeutigam, 2013-11-18 Business professionals that struggle to understand key concepts in economics and how they are applied in the field rely on *Microeconomics*. The 5th edition makes the material accessible while helping them build their problem-solving skills. It includes numerous new practice problems and exercises that arm them with a deeper understanding. Learning by Doing exercises explore the theories while boosting overall math skills. Graphs are included throughout the mathematical discussions to reinforce the material. In addition, the balanced approach of rigorous economics gives business professionals a more practical resource.
