*Tutankhamun and Carter* Rogerio Sousa, Gabriele Pieke, Tine Bagh, 2024-08-15 First scholarly multi disciplinary re assessment of Howard Carter s discovery and excavation of Tutenkhamun s tomb and the impact of the find on our understanding of the material culture of Ancient Egypt The discovery of the tomb of Tutankhamun in 1922 stands out as one of the most important finds of modern archaeology revealing an enormous wealth of objects encapsulating techniques vestiges of uses and re uses of materials as well as unrivalled clues regarding the complex set of beliefs associated with the pharaonic funerary material culture Once cleared from the tomb these objects have captivated the world with their irresistible charm and beauty ending up playing a role in contemporary popular culture However it seems that such magnetism rather hindered than facilitated the scholarly study of the find One hundred years after the discovery of this magnificent tomb most of its objects remain insufficiently studied to this day This volume aims to show how it remains challenging to study Tutankhamun s objects gathering a collection of studies authored by leading scholars on conservation materials funerary beliefs as well as the reception of motifs and the impact of the discovery Through these studies it becomes clear how ancient objects can help us reconstruct the complex fabric of the ancient Egyptian society and how they keep interacting with modern audiences

**Gendered Practices of Rulership at the Court of Württemberg, 1568-1634** Regine Maritz, 2025-08-14 Gender history has alerted us to the fact that it is misleading to assume transhistorical features when it comes to issues such as childbearing mother and fatherhood and gendered systems of labour division Instead all of these are culturally inflected and thus variable across time Gendered Practices of Rulership at the Court of Württemberg 1568 1634 explores the ways in which socially constructed differences between men and women supported the dynastic practice of power in the early modern duchy of Württemberg The book investigates three generations of the Württemberg ducal family from the late sixteenth to the first half of the seventeenth century In five chapters five gendered practices are examined They include the gendering of courtly space of high ceremonial events and of dynastic marriage and concubinage as well as the gendering of kinship practices The history of the Württemberg dynasty in this period allows for the observation of a range of approaches to the practice of power It is documented by rich archival sources many of which are analysed here for the first time and thus provides opportunities for comparison between different ruling couples Duke Friedrich I rarely saw eye to eye with his wife Duchess Sibylla von Anhalt r 1593 1608 and he engaged in numerous extramarital affairs even seeking to institutionalise concubinage This couple's son Duke Johann Friedrich enjoyed a much more harmonious relationship with his wife Duchess Barbara Sophia von Brandenburg r 1608 1628 with the couple amicably sharing many tasks of rulership The book however does not merely seek to show how individual men women and couples engaged in dynastic rulership through gendered relationships Instead it also seeks to identify the types of gendered work the dynastic system relied on in order to remain functional over a long period of time To do so examples of failed relationships are at least as useful as those of marriages built on common understanding As a result of this methodological shift aspects of life at court emerge that have previously escaped in depth discussion for instance the emotionally cohesive effects of gendered court topography as well as the crucial emotion work dynastic women were expected to perform in their marital relationships and which had wide reaching political consequences
