Grade 2 Scientific Inquiry Performance Task: Magnetic Forces

Science Standards:

- 2.2 Interaction and Change: Living and non-living things change.
 - 2.2P.1 Compare and contrast how objects and materials respond to magnetic forces.
- 2.3 Scientific Inquiry: Scientific inquiry is a process used to explore the natural world using evidence from observations and investigations.
 - 2.35.1 Observe, measure, and record properties of objects and substances using simple tools to gather data and extend the senses.
 - 2.3S.2 Make predictions about living and non-living things and events in the environment based on observed patterns.
 - 2.35.3 Make, describe, and compare observations, and organize recorded data.

Learning Targets:

- I can show that objects will respond differently to magnetic forces.
- I can explain whether an object will be attracted to a magnet, based on what it is made of.

Language Target:

 I can use transition words to compare and contrast magnetic and non-magnetic surfaces.

Language Vocabulary:

Compare words: just like, like, the same as, similar to

Contrast words: but, on the other hand, however, even though

Sentence Frames (examples):

The <u>object</u> is magnetic <u>contrast word</u> the <u>second object</u> is not. (The paper clip is magnetic however the paper is not.)

The <u>object</u> is magnetic <u>compare word</u> the <u>second object</u>.

(The paper clip is magnetic just like the key.)

Electricity & Magnetism, Grades 5 - 8 Beaver, Powers, 2002-09-27 Connect students in grades 5 and up with science using Electricity and Magnetism This 80 page book covers topics such as static charges magnetic fields understanding a compass lighting a bulb and circuits It contains subject specific concepts and terminology inquiry based activities challenge questions extension activities assessments curriculum resources a bibliography and materials lists The book supports National Science Education Standards NCTM standards and Standards for Technological Literacy **Electricity and Magnetism in Biology and Medicine** Ferdinando Bersani, 2012-12-06 In the last few decades the research on bioelectromagnetics has expanded worldwide About one thousand researchers are now working in the field in a variety of institutions throughout the world including medical biological engineering and technical laboratories and protection agencies After many years of research a clear picture is now emerging Initially the research was mainly interested in the therapeutic applications of ELF electric and magnetic fields and the RF range was mainly taken into consideration with respect to thermal effects only Then tne growing body of biological effects of ELF fields on cells and biological tissues particularly for the repair processes in bone have drawn the attention of researchers to non thermal effects ranging from static fields to microwaves A specific field of interest that has been the object of a large debate in the last twenty years has been the potential health risk associated with electric power production and distribution and more recently with domestic and industrial appliances. In the last few years the explosion of the market for cellular phones has highlighted the issue of possible health dangers related to their use and to the widespread presence of base stations The first World Congress on Electricity and Magnetism in Biology and Medicine was held in Orlando Florida in 1992 and collected the widest amount of contributi9ns from almost all the major researchers involved in the field Electricity & Magnetism, Grades 5 - 12 John B. Beaver, Ph.D., Don Powers, Ph.D., 2003-01-01 Electricity and magnetism have never been so fun This comprehensive classroom supplement resource includes subject specific concepts and terminology inquiry based activities challenge questions extension activities assessments curriculum resources a bibliography and materials lists Topics covered include static charges magnetic fields understanding a compass lighting a bulb circuits and more It supports NSE and NCTM standards as well as Standards for Technological Literacy STL Mark Twain Media Publishing Company specializes in providing captivating supplemental books and decorative resources to complement middle and upper grade classrooms Designed by leading educators the product line covers a range of subjects including mathematics sciences language arts social studies history government fine arts and character Mark Twain Media also provides innovative classroom solutions for bulletin boards and interactive whiteboards Since 1977 Mark Twain Media has remained a reliable source for a wide variety of engaging classroom resources Harcourt Science: Physical science, [grade] 4, Units E and F, teahcer's ed. Activities Linking Science with Math, K-4 John Eichinger, 2009-05-15 Science does not exist in a vacuum and therefore shouldn t be taught that way In that spirit Activities Linking Science With Math K 4 is a hands on guide for preservice and inservice elementary school teachers who want to connect science instruction with other areas of studyincluding visual arts social sciences language arts and especially math The Magnet 28 Day Challenge: A Challenge a Day to Change Your Life! Brenda El-Leithy, 2012-02-01 What we experience in life both good and bad is the result of our ability to attract to ourselves events people and situations that are on the same energetic wavelength. We are beings of energy and as such we are all perfect magnets attracting according to our personal energy vibration A high positive vibration attracts positive events people and situations a low negative vibration attracts more negativity. So if you re not experiencing the life that you want it could be that you are not energetically attuned for positive results Or equally if you re not working on your own personal magnetism allowing yourself to be influenced by other people's energy levels good or bad your experience of life will reflect your environment So who s creating your reality By following this Challenge you can become aware of your own energy levels and those around you and then use the techniques to tune yourself into a more positive vibration that attracts Harcourt Science: Physical science, [grade] 5, Units E and F, teacher's ed ,2000 positive results The Content Of Science: A Constructivist Approach To Its Teaching And learning Peter J. Fensham, Richard F. Gunstone, Richard T. White, 2013-11-26 First published in 1994 Leading scholars in science education from eight countries on four continents and ex pert practising science teachers primary and secondary wrote about the teaching and learning of particular science content or skills and hence how different science content requires different sorts of teaching and learning Having shared the papers they then met to discuss them and subsequently revised them The result is a coherent set of chapters that share valuable insights about the teaching and learning of science Some chapters consider the detail of specific topics e g floating

and sinking soil and chemical change some describe innovative procedures others provide powerful theory Together they provide a comprehensive analysis of constructivist learning and teaching implications The Content Of Science: A Constructivist Approach To Its Teaching And learning Peter J. as it occurs in and out of schools The book captures the dialogic and interactive nature of the transferring the activity theory to both formal and informal science education It also contributes to the development of innovative curricula school science textbooks educational programs and ICT's materials As a whole the book moves theorizing and practicing of science education into new face and uncharted terrain It is recommended to new scholars and researchers as well as teachers Scientific and Technical Aerospace Reports, 1994 Lists citations with abstracts for aerospace related reports obtained from world wide sources and announces documents that have recently been entered into the NASA Scientific and Technical Information Database Nanoferrites for Emerging Environmental Applications Atul Thakur, Preeti Thakur, 2024-09-25 Nanoferrites for Emerging Environmental Applications discusses the synthesis and structure of nanoferrites as well as their electrical optical and magnetic properties. This book also provides a detailed discussion of the use of nanoferrites for various environmental applications such as for water and air pollution detection and remediation This book covers almost every aspect of nanoferrites for environmental applications and will be of great use to researchers working in multidisciplinary areas Nanoferrites superior electronic optical and magnetic properties make them promising agents in a wide spectrum of applications After looking at the fundamentals of nanoferrites this book proceeds to analyze their application in a comprehensive range of environmental applications Topics covered include wastewater treatment the removal of heavy metal ions remediation of organic and inorganic pollutants and their use in the detection and remediation of both air and solid pollution Future opportunities for research are also addressed Focuses on nanoferrite applications for air and water pollution detection and remediation through purification Includes detailed synthesis procedures and advanced characterization methods for nanoferrites Explores ways that nanoferrites can be used in various environmental applications and then be recovered after use Prentice Hall Science Explorer Michael J. Padilla, 2002 Vulnerability Assessment of Physical Protection Systems Mary Lynn Garcia, 2005-12-08 Vulnerability Assessment of Physical Protection Systems guides the reader through the topic of physical security with a unique detailed and scientific approach The book describes the entire vulnerability assessment VA process from the start of planning through final analysis and out brief to senior management It draws heavily on the principles introduced in the author's best selling Design and Evaluation of Physical Protection Systems and allows readers to apply those principles and conduct a VA that is aligned with system objectives and achievable with existing budget and personnel resources The text covers the full spectrum of a VA including negotiating tasks with the customer project management and planning of the VA team membership and step by step details for performing the VA data collection and analysis It also provides important notes on how to use the VA to suggest design improvements and generate multiple design options The text ends with a discussion of how to out brief the results to senior management in order to gain their support and demonstrate the return on investment of their security dollar Several new tools are introduced to help readers organize and use the information at their sites and allow them to mix the physical protection system with other risk

management measures to reduce risk to an acceptable level at an affordable cost and with the least operational impact This book will be of interest to physical security professionals security managers security students and professionals and government officials Guides the reader through the topic of physical security doing so with a unique detailed and scientific approach Takes the reader from beginning to end and step by step through a Vulnerability Assessment Over 150 figures and tables to illustrate key concepts
