research papers on the use of satellite aerial and ground based remote sensing to detect thermal features and anomalies investigate lava and pyroclastic flows predict the flow path of lahars measure gas emissions and plumes and estimate ground deformation The multi disciplinary character of the approaches employed for volcano monitoring and the combination of a variety of sensor types platforms and methods that come out from the papers testify to the current scientific and technology trends toward multi data and multi sensor monitoring solutions The added value of the papers lies in the demonstration of how remote sensing can improve our knowledge of volcanoes that pose a threat to local communities back analysis and critical revision of recent volcanic eruptions and unrest periods and improvement of modeling and prediction methods Therefore the selected case studies also demonstrate the societal impact that this scientific discipline can potentially have on volcanic hazard and risk management

Detecting, Modelling and Responding to Effusive Eruptions A.J.L. Harris,T. De Groeve,F. Garel,S.A. Carn,2016-06-28 For effusive volcanoes in resource poor regions there is a pressing need for a crisis response chain bridging the global scientific community to allow provision of standard products for timely humanitarian response As a first step in attaining this need this Special Publication provides a complete directory of current operational capabilities for monitoring effusive eruptions This volume also reviews the state of the art in terms of satellite based volcano hot spot tracking and lava flow simulation These capabilities are demonstrated using case studies taken from well known effusive events that have occurred worldwide over the last two decades at volcanoes such as Piton de la Fournaise Etna Stromboli and Kilauea We also provide case type response models implemented at the same volcanoes as well as the results of a community wide drill used to test a fully integrated response focused on an operational hazard GIS Finally the objectives and recommendations of the Risk Evaluation Detection and Simulation during Effusive Eruption Disasters working group are laid out in a statement of community needs by its members
