

Sample Reflective Essay

Author: Nekisa Mahzad

I have been a student at California State University Channel Islands (CI) for 5 semesters, and over the course of my stay I have grown and learned more than I thought possible. I came to this school from Moorpark Community College already knowing that I wanted to be an English teacher; I had taken numerous English courses and though I knew exactly what I was headed for-was I ever wrong. Going through the English program has taught me so much more than stuff about literature and language, it has taught me how to be me. I have learned here how to write and express myself, how to think for myself, and how to find the answers to the things that I don't know. Most importantly I have learned how important literature and language are.

When I started at CI, I thought I was going to spend the next 3 years reading classics, discussing them and then writing about them. That was what I did in community college English courses, so I didn't think it would be much different here. On the surface, to an outsider, I am sure that this is what it appears that C.I. English majors do. In most all my classes I did read, discuss, and write papers; however, I quickly found out that that there was so much more to it. One specific experience I had while at C.I. really shows how integrated this learning is. Instead of writing a paper for my final project in Perspectives of Multicultural Literature (ENGL 449), I decided with a friend to venture to an Indian reservation and compare it to a book we read by Sherman Alexie. We had a great time and we learned so much more that we ever could have done from writing a paper. The opportunity to do that showed me that there are so many ways that one can learn that are both fun and educational.

The English courses also taught me how powerful the written word and language can be. Words tell so much more than a story. Stories tell about life and the human condition, they bring up the past and people and cultures that are long gone. Literature teaches about the self and the world surrounding the self. From these classes I learned about the world, its people and its history; through literature I learned how we as humans are all related. By writing about what we learn and/or what we believe, we are learning how to express ourselves.

I know that my ability to write and express my ideas, thoughts and knowledge has grown stronger each semester. I have always struggled to put my thoughts on paper in a manner that is coherent and correct according to assignments. I can remember being told numerous times in community college to "organize your

cannot be learned solely in writing classes but must be acquired by immersion in various discourse communities in and out of academic settings The End of Composition Studies provides a compelling rhetoric and rationale for eliminating the field and reenvisioning the profession as truly interdisciplinary a change that is necessary in order to fulfill the needs and demands of students instructors administrators and our democratic society

The Psychologically Literate Citizen Dana Dunn, 2013-01-01 The concepts of psychological literacy

and the psychologically literate citizen promise to invigorate a new global approach to psychology education. They pose a basic question: What attributes and capabilities should undergraduate psychology majors acquire? Many psychological organizations have defined psychological literacy by guidelines and lists of student learning outcomes, but although psychology educators across the globe have been working towards helping students to acquire these attributes over the past 50 years, educators have only recently explicitly delineated attributes and learning outcomes and sought to develop appropriate learning, teaching, and assessment strategies, including whole program approaches. The contributors to this volume argue that psychological literacy is the most important outcome of an undergraduate psychology education and that psychologically literate citizens use their knowledge of psychology to problem solve in ethical and socially responsible ways that directly benefit their communities. In this book, a rich variety of international perspectives contribute to the development of the two key concepts of psychological literacy and the psychologically literate citizen. Authors provide practical guidance for classroom psychology educators as well as curriculum developers and reviewers. Ultimately, they make the case for a paradigm shift in psychology education.
