Slave Breeding In The Us:

Slave Breeding Gregory D. Smithers, 2012-11-01 This book is an exploration of the idea of selective and forced slave breeding in the U S based on the collective memory and folktales of the descendants of enslaved people For over two centuries the topic of slave breeding has occupied a controversial place in the master narrative of American history From nineteenth century abolitionists to twentieth century filmmakers and artists Americans have debated whether slave owners deliberately and coercively manipulated the sexual practices and marital status of enslaved African Americans to reproduce new generations of slaves for profit In this bold and provocative book a historian investigates how African Americans have narrated remembered and represented slave breeding practices He argues that while social and economic historians have downplayed the significance of slave breeding African Americans have never been able to forget the trauma of violence and sexual coercion associated with the plantation South By placing African American histories and memories of slave breeding within the larger context of America s history of racial and gender discrimination the author reveals how sexual exploitation was both experienced and remembered by African Americans to inform how Black Americans understand the political social and cultural nature of life in the United States This fascinating provocative work sheds much needed light on African American cultural memories the perceptions of fragile Black families and the long history of racially motivated violence against men women and children of color

Neither Black Nor White Carl N. Degler, 1986 Carl Degler's 1971 Pulitzer Prize winning study of comparative slavery in Brazil and the United States is reissued in the Wisconsin paperback edition making it accessible for all students of American and Latin American history and sociology Until Degler's groundbreaking work scholars were puzzled by the differing courses of slavery and race relations in the two countries Brazil never developed a system of rigid segregation such as appeared in the United States and blacks in Brazil were able to gain economically and retain far more of their African culture Rejecting the theory of Gilberto Freyre and Frank Tannenbaum that Brazilian slavery was more humane Degler instead points to a combination of demographic economic and cultural factors as the real reason for the differences In the early 1970s when studies in social history were beginning to blossom on the North American scene Carl Degler's prize winning contribution was a thoughtful provocative essay in comparative history Its thoughtfulness has not diminished with

the years Indeed it is as topical today as when it was first published The Brazilian experience with rapid industrialization and its attempt to restore democratic government indicates that the issues which Degler treated in the early 1970s are more pertinent than ever today Franklin W Knight Department of History Johns Hopkins University *Neoliberalism or Neocollective Rural China* Xinyu Lu,2024-12-01 This book presents a groundbreaking critique of neo liberal interpretations of global agricultural development challenging dominant narratives with nuanced analyses rooted in historical and theoretical frameworks It delves into diverse paths of agrarian transformation from the American Path to the Prussian Path examining the complexities of state intervention land ownership and socio political dynamics Furthermore it introduces an alternative vision for agricultural development the construction of Neo collective Rural China Through meticulous examination of case studies spanning China Russia and beyond it unveils the intricacies of rural economies migrant worker trends and grassroots innovations Emphasizing the need for inclusive policies and international collaboration this work reimagines strategies for sustainable growth in the Global South advocating for sovereignty equity and solidarity A compelling synthesis of scholarship it offers fresh insights into the multifaceted challenges facing contemporary agricultural development
