**Downstream Industrial Biotechnology** Michael C. Flickinger,2013-03-12 DOWNSTREAM INDUSTRIAL BIOTECHNOLOGY An affordable easily accessible desk reference on biomanufacturing focused on downstream recovery and purification Advances in the fundamental knowledge surrounding biotechnology novel materials and advanced engineering approaches continue to be translated into bioprocesses that bring new products to market at a significantly faster pace than most other industries Industrial scale biotechnology and new manufacturing methods are revolutionizing medicine environmental monitoring and remediation consumer products food production agriculture and forestry and continue to be a major area of research The downstream stage in industrial biotechnology refers to recovery isolation and purification of the microbial products from cell debris processing medium and contaminating biomolecules from the upstream process into a finished product such as biopharmaceuticals and vaccines Downstream process design has the greatest impact on overall biomanufacturing cost because not only does the biochemistry of different products e g peptides proteins hormones antibiotics and complex antigens dictate different methods for the isolation and purification of these products but contaminating byproducts can also reduce overall process yield and may have serious consequences on clinical safety and efficacy Therefore downstream separation scientists and engineers are continually seeking to eliminate or

combine unit operations to minimize the number of process steps in order to maximize product recovery at a specified concentration and purity Based on Wiley s Encyclopedia of Industrial Biotechnology Bioprocess Bioseparation and Cell Technology this volume features fifty articles that provide information on down stream recovery of cells and protein capture process development and facility design equipment PAT in downstream processes downstream cGMP operations and regulatory compliance It covers Cell wall disruption and lysis Cell recovery by centrifugation and filtration Large scale protein chromatography Scale down of biopharmaceutical purification operations Lipopolysaccharide removal Porous media in biotechnology Equipment used in industrial protein purification Affinity chromatography Antibody purification monoclonal and polyclonal Protein aggregation precipitation and crystallization Freeze drying of biopharmaceuticals Biopharmaceutical facility design and validation Pharmaceutical bioburden testing Regulatory requirements Ideal for graduate and advanced undergraduate courses on biomanufacturing biochemical engineering biopharmaceutical facility design biochemistry industrial microbiology gene expression technology and cell culture technology Downstream Industrial Biotechnology is also a highly recommended resource for industry professionals and libraries      **Robotics in Meat, Fish and Poultry**

**Processing** K. Khodabandehloo, 2012-12-06 The past decade has seen growing interest in the use of robotic technology in the food sector There is a strong indication that this sector and in particular industries dealing with meat fish and poultry products would make even more use of robotics if such technology were better suited to the specific needs of the food production environment Clearly the poten tial is high This book aims to provide the reader with the state of robotic technology currently under development For the first time a series of chapters written by leading international authors brings together a range of topics in robotics as applicable to meat fish and poultry processing The contents will interest researchers managers manufacturing engin eers consultants and students Manufacturers and suppliers of robotic technology or food machinery are strongly recommended to examine the content and exploit the potential benefits described The co operation and indeed the full active involvement of research establishments manufac turers and food producers in teams is essential in order to achieve the maximum use of robotics      **Fossil Energy Update** ,1982
