

A large, leafy tree with a thick trunk and dense green foliage dominates the left side of the image. It casts a shadow over a dirt path that leads into the distance. The path is flanked by a field of bluebonnets, which are in full bloom, creating a vibrant blue carpet. In the background, more trees and a fence are visible under a bright blue sky with scattered white clouds.

Kiowa Humanity and the Invasion of the State Jacki Thompson Rand, 2008-01-01 Kiowa Humanity and the Invasion of the State illuminates the ways in which Kiowas on the southern plains dealt with the U S government s efforts to control them after they were forced onto a reservation by an 1867 treaty The overarching effects of colonial domination resembled those suffered by other Native groups at the time a considerable loss of land and population decline as well as a continual erosion of the Kiowas political cultural economic and religious sovereignty and traditions Although readily acknowledging these far reaching consequences Jacki Thompson Rand sees the root impact of colonialism and the concomitant Kiowa responses as centered less on policy disputes than on the disruptions to their daily life and to their humanity Colonialism attacked the Kiowas on the most human everyday level through starvation outbreaks of smallpox emotional disorientation and continual difficulties in securing clothing and shelter and the Kiowas responses and counterassertions of sovereignty thus tended to focus on efforts to feed their people sustain the physical community and preserve psychic equilibrium Offering a fresh original view of Native responses to colonialism this study demonstrates amply that Native struggles against the encroachment of the state go well beyond armed resistance and political strategizing Rand shows that the Native response was born of everyday survival and the yearning for well being and community

Southern Counterpart to Lewis & Clark Dan Louie Flores,2002 In 1806 President Thomas Jefferson sent cartographer Thomas

Freeman and botanist Peter Custis to explore the southern Louisiana Purchase westward to the Rocky Mountains. Stopped by a Spanish army in what is today extreme southern Oklahoma, they did not complete their mission. President Jefferson minimized their failure by focusing instead on the success of their northern counterparts Lewis and Clark. Hence the fame of Lewis and Clark and the virtual anonymity of Freeman and Custis until now thanks to editor Dan L. Flores. Dan Flores presents the primary documents created by Freeman and Custis during their ill-fated attempt to explore the Louisiana territory and areas west of the Mississippi in 1806.

A Profile of Economic Plants John C. Roecklein, Ping Sun Leung, 1987-01-01

Historic Native Peoples of Texas William C. Foster, 2009-02-17

An incredibly detailed account of Indigenous lifeways during the initial rounds of European exploration in south central North America. Several hundred tribes of Native Americans were living within or hunting and trading across the present-day borders of Texas when Cabeza de Vaca and his shipwrecked companions washed up on a Gulf Coast beach in 1528. Over the next two centuries, as Spanish and French expeditions explored the state, they recorded detailed information about the locations and lifeways of Texas's Native peoples. Using recent translations of these expedition diaries and journals along with discoveries from ongoing archaeological investigations, William C. Foster here assembles the most complete account ever published of Texas's Native peoples during the early historic period AD 1528 to 1722. Foster describes the historic Native peoples of Texas by geographic regions. His chronological narrative records the interactions of Native groups with European explorers and with Native trading partners across a wide network that extended into Louisiana, the Great Plains, New Mexico, and northern Mexico. Foster provides extensive ethnohistorical information about Texas's Native peoples as well as data on the various regions' animals, plants, and climate. Accompanying each regional account is an annotated list of named Indigenous tribes in that region and maps that show tribal territories and European expedition routes. A very useful encyclopedic regional account of the Europeans and Native peoples of Texas who encountered one another during the relatively unexamined two hundred years before the Spanish occupation of Texas and the French establishment of Louisiana. *Southwestern Historical Quarterly*

Trees of North Texas Robert A. Vines, 2014-01-07

This comprehensive and compact volume is a field guide to all the native and naturalized trees of the north Texas zone, including the Blackland Prairies, the Cross Timbers region, and both the Rolling and High Plains. Here too is detailed information on the many varieties of trees introduced into the Dallas-Fort Worth region over the twentieth century. Drawn from Robert A. Vines' monumental *Trees, Shrubs, and Woody Vines of the Southwest* (University of Texas Press, 1960), the field guide contains full descriptions of every tree in the area. Its convenient organization makes *Trees of North Texas* ideal to take into the field for on-the-spot identification, and virtually every description is accompanied by a finely executed illustration. Fascinating bits of history and lore enliven the descriptions throughout.
