Gaffney,1999-06 We have all heard the stories There are likely going to be some changes and effects of the Y2K that strike randomly in the communities around us in the coming months The Y2K is not a singular day event it is a series of events and risks that coincide during a six month period with interrelated consequences dispersed across an 18 month period The government business and banking communities seem to be going through the paces of readiness and testing but what about the rest of us What can we do to prepare and avert the certain inconveniences and randomly dispersed more serious impacts that are likely to come Y2K and the American Dream focuses on the preparedness of the individual and their families It s purpose is not to advocate reactionary panic but to induce sound financial and practical readiness in a timely fashion to assure minimal impact by the fallout of the event itself The Millennium is methodically divided into four Millennium Periods and six specific Millennium Impact Categories The chapters detail those periods and categories and leads to a preparation checklist that assesses specific risks that must be addressed in each category and in each period in order to minimize overall Y2K impact **The Practical Real-Time Enterprise** Bernd Kuglin,2005-02-21 The basic idea of the real time enterprise is to become quicker A business which wants to become a real time enterprise has to acquire three main abilities Internal and external data is integrated quickly and in real time in a well organized company data pool Analyses of information in the company data pool can be obtained in real time across function boundaries and at the touch of a button The number of working steps performed in batch mode is shifting dramatically in favor of immediate completion in real time The issue of communications or real time communications plays a special role here Studies have shown that processing times sometimes double when necessary communication events are handled in batch mode in the business process and not in real time In other words when an activity cannot be completed and lies around for days because an urgently needed partner cannot be contacted The necessity of acquiring these three
