

Student Council Secretary Speech

I really enjoy participating in student council and that's why I decided to run for secretary. As most of you know my name is **Carrie Cassareello** and let me tell you why you should vote for me.

I am dedicated to student council. I have attended all the meetings this year. I also contribute time and effort to student council. In my free time at school (in between periods or during my lunch), I made power points for the class cup events, updating my class on what was going on and I kept them involved. The secretary has to keep a record of the minutes during meetings, which means they have to write or take notes on what we discussed in the meeting. I am very organized and I would make sure not to lose any papers or any work I did.

I also consider myself a team player. I play on many sports teams and contribute in many ways. I really enjoy working with other people, it's good to give and receive ideas. Together we can come up with great ideas to help the school and community. Student council is a great way to be involved, it is a great way to get to know and work with new people.

I have been a representative for 2 years, so I have experience and am ready for any challenge, I am ready to work. I am ready to help our community. I would really enjoy being our student council secretary.

I believe I would be the perfect candidate because I am dedicated, I am organized, I am trustworthy and because I am a hard worker.

And don't forget

"Take note, the right vote is Carrie Cassareello for Secretary"

Thank you!

Deep Learning Techniques Applied to Affective Computing Zhen Cui, Wenming Zheng, 2023-06-14 Affective computing refers to computing that relates to arises from or influences emotions The goal of affective computing is to bridge the gap between humans and machines and ultimately endow machines with emotional intelligence for improving natural human machine interaction In the context of human robot interaction HRI it is hoped that robots can be endowed with human like capabilities of observation interpretation and emotional expression The research on affective computing has recently achieved extensive progress with many fields contributing including neuroscience psychology education medicine behavior sociology and computer science Current research in affective computing concentrates on estimating human emotions through different forms of signals such as speech face text EEG fMRI and many others In neuroscience the neural mechanisms of emotion are explored by combining neuroscience with the psychological study of personality emotion and mood In psychology and philosophy emotion typically includes a subjective conscious experience characterized primarily by psychophysiological expressions biological reactions and mental states The multi disciplinary features of understanding emotion result in the fact

that inferring the emotion of humans is definitely difficult As a result a multi disciplinary approach is required to facilitate the development of affective computing One of the challenging problems in affective computing is the affective gap i e the inconsistency between the extracted feature representations and subjective emotions To bridge the affective gap various hand crafted features have been widely employed to characterize subjective emotions However these hand crafted features are usually low level and they may hence not be discriminative enough to depict subjective emotions To address this issue the recently emerged deep learning also called deep neural networks techniques provide a possible solution Due to the used multi layer network structure deep learning techniques are capable of learning high level contributing features from a large dataset and have exhibited excellent performance in multiple application domains such as computer vision signal processing natural language processing human computer interaction and so on The goal of this Research Topic is to gather novel contributions on deep learning techniques applied to affective computing across the diverse fields of psychology machine learning neuroscience education behavior sociology and computer science to converge with those active in other research areas such as speech emotion recognition facial expression recognition Electroencephalogram EEG based emotion estimation human physiological signal heart rate estimation affective human robot interaction multimodal affective computing etc We welcome researchers to contribute their original papers as well as review articles to provide works regarding the neural approach from computation to affective computing systems This Research Topic aims to bring together research including but not limited to Deep learning architectures and algorithms for affective computing tasks such as emotion recognition from speech face text EEG fMRI and many others Explainability of deep Learning algorithms for affective computing Multi task learning techniques for emotion personality and depression detection etc Novel datasets for affective computing Applications of affective computing in robots such as emotion aware human robot interaction and social robots etc

Acquiring Pragmatics Sandrine Zufferey, 2014-11-27 *Acquiring Pragmatics* offers a comprehensive synthesis of state of the art research on the acquisition of pragmatics It introduces the current topics of research in theoretical pragmatics and explores the issues they raise for language acquisition research and the new experimental designs which have been developed to address them While each chapter covers each topic in depth it also places a strong emphasis on the underlying methodological aspects of each issue which will help the reader to develop their own experimental designs Key topics covered include The interfaces between pragmatics and language acquisition The social aspects of pragmatic competence The cognitive aspects of pragmatic competence The acquisition of pragmatics in autistic spectrum disorders and second language acquisition *Acquiring Pragmatics* is key reading for advanced undergraduate and graduate students studying pragmatics and language acquisition

The relationship between music and language Lutz Jäncke, Traditionally music and language have been treated as different psychological faculties This duality is reflected in older theories about the lateralization of speech and music in that speech functions were thought to be localized on the left and music functions on the right hemisphere But with the advent of modern brain imaging techniques and the improvement of neurophysiological measures to investigate brain functions an entirely new view on the neural and psychological underpinnings of music and speech has evolved The main point of convergence in the findings of these new studies is that music and speech functions have many aspects in common and that several neural modules are similarly involved in speech and music There is also emerging evidence that speech functions can benefit from music functions and vice versa This new research field has accumulated a lot of new information and it is therefore timely to bring together the work of those researchers who have been most visible productive and inspiring in this field and to ask them to present their new work or provide a summary of their laboratory s work

Phonetics and Speech Science Ian R. A. MacKay,2023-05-11 Phonetics is a fundamental building block not just in linguistics but also in fields such as communication disorders However introductions to phonetics can often assume a background in linguistics whilst at the same time overlooking the clinical and scientific aspects of the field This textbook fills this gap by providing a comprehensive yet accessible overview of phonetics that delves into the fundamental science underlying the production of speech Written with beginners in mind it focuses on the anatomy and physiology of speech while at the same time explaining the very basics of phonetics such as the phonemes of English the International Phonetic Alphabet and phonetic transcription systems It presents the sounds of speech as elements of linguistic structure and as the result of complex biological mechanics It explains complicated terminology in a clear easy to understand way and provides examples from a range of languages from disorders of speech and from language learning

Speech Processing for IP Networks David Burke,2007-03-13 Media Resource Control Protocol MRCP is a new IETF protocol providing a key enabling technology that eases the integration of speech technologies into network equipment and accelerates their adoption resulting in exciting and compelling interactive services to be delivered over the telephone MRCP

leverages IP telephony and Web technologies such as SIP HTTP and XML Extensible Markup Language to deliver an open standard vendor independent and versatile interface to speech engines Speech Processing for IP Networks brings these technologies together into a single volume giving the reader a solid technical understanding of the principles of MRCP how it leverages other protocols and specifications for its operation and how it is applied in modern IP based telecommunication networks Focusing on the MRCPv2 standard developed by the IETF SpeechSC Working Group this book will also provide an overview of its precursor MRCPv1 Speech Processing for IP Networks Gives a complete background on the technologies required by MRCP to function including SIP Session Initiation Protocol RTP Real time Transport Protocol and HTTP Hypertext Transfer Protocol Covers relevant W3C data representation formats including Speech Synthesis Markup Language SSML Speech Recognition Grammar Specification SRGS Semantic Interpretation for Speech Recognition SISR and Pronunciation Lexicon Specification PLS Describes VoiceXML the leading approach for programming cutting edge speech applications and a key driver to the development of many of MRCP s features Explains advanced topics such as VoiceXML and MRCP interworking This text will be an invaluable resource for technical managers product managers software developers and technical marketing professionals working for network equipment manufacturers speech engine vendors and network operators Advanced students on computer science and engineering courses will also find this to be a useful guide

Waveform Analysis of Sound Mikio Tohyama, 2015-01-10 What is this sound What does that sound indicate These are two questions frequently heard in daily conversation Sound results from the vibrations of elastic media and in daily life provides informative signals of events happening in the surrounding environment In interpreting auditory sensations the human ear seems particularly good at extracting the signal signatures from sound waves Although exploring auditory processing schemes may be beyond our capabilities source signature analysis is a very attractive area in which signal processing schemes can be developed using mathematical expressions This book is inspired by such processing schemes and is oriented to signature analysis of waveforms Most of the examples in the book are taken from data of sound and vibrations however the methods and theories are mostly formulated using mathematical expressions rather than by acoustical interpretation This book might therefore be attractive and informative for scientists engineers researchers and graduate students who are interested in the mathematical representation of signals and the applications of Fourier analysis The book can be described as being practically self contained but does assume readers are familiar with introductory topics in discrete signal processing as in the discrete Fourier transform Hence this book might be also usable as a textbook in graduate courses in applied mathematics on topics such as complex functions Almost all scientific phenomena are sensed as waves propagating in some space Over the years waveform analysis has therefore been one of the resilient academic areas of study and still is seen as fertile ground for development In particular waveform analysis based on the theory of linear systems would be a good example where a physical interpretation can be given to the mathematical theory of complex functions in terms of magnitude angle poles and zeros of complex functions For readers who are interested in the physical aspects of sound and vibration data or elementary formulation of wave equations and their solutions the book *Sound and Signals* by M Tohyama Springer 2011 is recommended It can serve as a complementary companion to this present volume or independently as a good reference

Foundations of Pragmatics Wolfram Bublitz, Neal R. Norrick, 2011-06-30 Open publication Opening the 9 volume series *Handbooks of Pragmatics* this handbook provides a comprehensive overview of the foundations of pragmatics It covers the central theories and approaches as well as key concepts and topics characteristic of mainstream pragmatics i e the traditional and most widespread approach to the ways and means of using language in authentic social contexts The in depth articles provide reliable orientational overviews useful to researchers students and teachers They are both state of the art reviews of their topics and critical evaluations in the light of subsequent developments Topics are thus considered within their scholarly context and also critically evaluated from current perspectives The five

major sections of the handbook are dedicated to the Conceptual and Theoretical Foundations with a historiographic overview of the establishment and subsequent development of pragmatics Key Topics investigating indexicality reference and other concepts that were the first to make their way from grammar into pragmatics and mainstream notions like speech acts types of inference the Place of Pragmatics in the Description of Discourse delimiting pragmatics from grammar semantics prosody literary criticism and Methods and Tools

Artificial Intelligence Assisted Structural Optimization Adithya Challapalli,Guoqiang Li,2025-02-27 Artificial Intelligence Assisted Structural Optimization explores the use of machine learning and correlation analysis within the forward design and inverse design frameworks to design and optimize lightweight load bearing structures as well as mechanical metamaterials Discussing both machine learning and design analysis in detail this book enables readers to optimize their designs using a data driven approach This book discusses the basics of the materials utilized for example shape memory polymers and the manufacturing approach employed such as 3D or 4D printing Additionally the book discusses the use of forward design and inverse design frameworks to discover novel lattice unit cells and thin walled cellular unit cells with enhanced mechanical and functional properties such as increased mechanical strength heightened natural frequency strengthened impact tolerance and improved recovery stress Inverse design methodologies using generative adversarial networks are proposed to further investigate and improve these structures Detailed discussions on fingerprinting approaches machine learning models structure screening techniques and typical Python codes are provided in the book The book provides detailed guidance for both students and industry engineers to optimize their structural designs using machine learning

Casanova, 2018-09-14 Volume I entitled Augmentation of Brain Functions Brain Machine Interfaces is a collection of articles on neuroprosthetic technologies that utilize brain machine interfaces BMIs BMIs strive to augment the brain by linking neural activity recorded invasively or noninvasively to external devices such as arm prostheses exoskeletons that enable bipedal walking means of communication and technologies that augment attention In addition to many practical applications BMIs provide useful research tools for basic science Several articles cover challenges and controversies in this rapidly developing field such as ways to improve information transfer rate BMIs can be applied to the awake state of the brain and to the sleep state as well BMIs can augment action planning and decision making Importantly BMI operations evoke brain plasticity which can have long lasting effects Advanced neural decoding algorithms that utilize optimal feedback controllers are key to the BMI performance BMI approach can be combined with the other augmentation methods such systems are called hybrid BMIs Overall it appears that BMI will lead to many powerful and practical brain augmenting technologies in the future **Pattern Recognition** Tieniu Tan, Xuelong Li, Xilin Chen, Jie Zhou, Jian Yang, Hong Cheng, 2016-10-21 The two volume set CCIS 662 and CCIS 663 constitutes the refereed proceedings of the 7th Chinese Conference on Pattern Recognition CCPR 2016 held in Chengdu China in November 2016 The 121 revised papers presented in two volumes were carefully reviewed and selected from 199 submissions The papers are organized in topical sections on robotics computer vision basic theory of pattern recognition image and video processing speech and language emotion recognition

The book delves into Transfer Speech Example. Transfer Speech Example is a vital topic that needs to be grasped by everyone, from students and scholars to the general public. The book will furnish comprehensive and in-depth insights into Transfer Speech Example, encompassing both the fundamentals and more intricate discussions.

1. The book is structured into several chapters, namely:

- Chapter 1: Introduction to Transfer Speech Example
- Chapter 2: Essential Elements of Transfer Speech Example
- Chapter 3: Transfer Speech Example in Everyday Life
- Chapter 4: Transfer Speech Example in Specific Contexts
- Chapter 5: Conclusion

2. In chapter 1, this book will provide an overview of Transfer Speech Example. This chapter will explore what Transfer Speech Example is, why Transfer Speech Example is vital, and how to effectively learn about Transfer Speech Example.
3. In chapter 2, the author will delve into the foundational concepts of Transfer Speech Example. This chapter will elucidate the essential principles that need to be understood to grasp Transfer Speech Example in its entirety.
4. In chapter 3, this book will examine the practical applications of Transfer Speech Example in daily life. This chapter will showcase real-world examples of how Transfer Speech Example can be effectively utilized in everyday scenarios.
5. In chapter 4, this book will scrutinize the relevance of Transfer Speech Example in specific contexts. The fourth chapter will explore how Transfer Speech Example is applied in specialized fields, such as education, business, and technology.
6. In chapter 5, this book will draw a conclusion about Transfer Speech Example. The final chapter will summarize the key points that have been discussed throughout the book.

The book is crafted in an easy-to-understand language and is complemented by engaging illustrations. This book is highly recommended for anyone seeking to gain a comprehensive understanding of Transfer Speech Example.
