Harmful Substance Use Tim Stockwell, Paul Gruenewald, John Toumbourou, Wendy Loxley, 2005-09-27 The prevention of harm from drug use both legal and illegal is a major concern to government departments and clinicians throughout the world. Recently much new research has been conducted regarding global levels and patterns of drug related harm on common risk factors with other social problems e.g. mental health crime and on the effectiveness of wide range of intervention strategies. There is a need to summarise and synthesise this new knowledge for use in a range of disciplines. Preventing Harmful Substance Use offers the most comprehensive and up to date advice available on the prevention of drug and alcohol abuse. Contributors provide authoritative science based reviews of knowledge on their areas of expertise and make clear recommendations for the future of prevention policy and practice. A final section draws the work together and offers a framework for an integrated science of prevention.
