The Changing Face of Transportation United States. Department of Transportation, 2000 *A Policy on Geometric Design of Highways and Streets*, 2011 American Association of State Highway and Transportation Officials, 2011

Development of Crash Imminent Test Scenarios for Integrated Vehicle-Based Safety Systems (IVBSS) Wassim Najm, John D. Smith, National Highway Traffic Safety Administration, 2007 This report identifies crash imminent test scenarios based on common pre crash scenarios for integrated vehicle based safety systems that alert the driver of a light vehicle or a heavy truck to an impending rear end lane change or run off road crash Pre crash scenarios describe vehicle movements and critical events immediately prior to the crash The General Estimates System GES crash database was queried to distinguish common pre crash scenarios for light vehicles 2003 GES and heavy trucks 2000 2003 GES in terms of their frequency of occurrence Analysis of two vehicle rear end crashes revealed four dominant scenarios that accounted for 97 percent of light vehicle crashes and 95 percent of heavy truck crashes in which the subject vehicle was striking Four scenarios were also identified from an analysis of two vehicle lane change crashes comprising 65 percent of light vehicle crashes and 76 percent of heavy truck crashes in which the subject vehicle was encroaching onto another vehicle in adjacent lanes There were five single vehicle run off road scenarios representing 63 percent of light vehicle crashes and 83 percent of heavy truck crashes excluding crashes caused by vehicle failure or evasive maneuver An additional set of scenarios is proposed to address multiple threats from near simultaneous critical events This report also provides a statistical description of individual scenarios in terms of their environmental factors roadway geometry and speed conditions *The Handbook of Highway Engineering* T.F. Fwa, 2005-09-28 Modern highway engineering reflects an integrated view of a road system s entire lifecycle including any potential environmental impacts and seeks to develop a sustainable infrastructure through careful planning and active management This trend is not limited to developed nations but is recognized across the globe Edited by renowned authority Highway Safety Literature ,1977 *Prohibit the Sale of Alcoholic Beverages to Persons Under 21 Years of Age* United States.
