

Tree Planting & Care Tips

Give your tree the best start!

1. Choose a Spot on your Property

- It should match your tree species' ideal growing conditions
- It should allow your tree to grow to mature size without interfering with anything (such as power lines, other trees & other infrastructure)
- It should be reachable! For watering or irrigation

2. Dig the Hole!

- **Width:** should be 3 times the width of the root ball to allow the roots to spread out
- **Depth:** only dig the hole as deep as the height of the root ball

3. Free Your Tree

- Carefully remove your tree from the container - do NOT pull on the trunk
- Carefully handle the root ball and straighten any circling roots

4. Plant Your Tree

- Place your tree straight so the trunk flare (the area where roots start to flare out at base of tree) will be slightly visible above the ground

5. Add Some Soil

- Fill in the hole with soil a few inches at a time - settle with water to make sure there are no air pockets

6. Mulch!

- Add a 2-4" thick ring of mulch (aka the Mulch Donut) around the base to help the soil retain moisture
- Do not pile mulch ON the trunk - this can decay the bark

7. Water Your Tree

- Remember to water- but don't over-soak the soil!
- Enough to keep the soil moist, which is usually at least once a week

* Tree Hugger Tip *

Share your Aloha! Studies have shown that plants grow faster when you talk them! How far will you go to become a full fledged tree-hugger?

Tag your Tree!

Share your tree with us for a chance to be featured! #ArborDayHawaii
