Abstract

A template is provided for writing paper reviews or term papers. Terminology relevant to writing a paper is also defined. For example, an *abstract* is a fifty to two hundred word summary of your paper that appears at the beginning of the paper.

1. Introduction

The introduction should define the problem you are studying, discuss the history of the problem and state its importance in the field. Applications of the problem can be discussed and basic examples should be given to illustrate the concepts, using figures if possible. Basic terminology should be defined and explained.

2. Background

In some cases, you may need to divide the introductory material in your paper into two sections. Oftentimes, a second section called the "Background" section is used. In the Background section, additional terms are defined and more historical information, such as previous results and a review of related papers, is given.

3. Results

The meat of a paper is contained in the next section(s), where the results are stated and explained. More than one section may be used in order to break the paper into logical, readable modules. In a survey paper or term paper, you will summarize, organize, and synthesize the results from the papers you read in the Results section(s).

4. Format

Proper grammar is essential. Proper style is also essential: informal style, casual style, personal style are all inappropriate for a professional paper. Read papers to get a sense of the proper style and tone to use.

Note the use of subsections in this section.
