oriented people who play to win Digital Playgrounds Sara M. Grimes, 2021-07-30 Digital Playgrounds explores the key developments trends debates and controversies that have shaped children s commercial digital play spaces over the past two decades It argues that children s online playgrounds virtual worlds and connected games are much more than mere sources of fun and diversion they serve as the sites of complex negotiations of power between children parents developers politicians and other actors with a stake in determining what how and where children s play unfolds Through an innovative transdisciplinary framework combining science and technology studies critical communication studies and children s cultural studies Digital Playgrounds focuses on the contents and contexts of actual technological artefacts as a necessary entry point for understanding the meanings and politics of children s digital play The discussion draws on several research studies on a wide range of digital playgrounds designed and marketed to children aged six to twelve years revealing how various problematic tendencies prevent most digital play spaces from effectively supporting children s culture rights and ironically play Digital Playgrounds lays the groundwork for a critical reconsideration of how existing approaches might be used in the development of new regulation as well as best practices for the industries involved in making children s digital play spaces In so doing it argues that children s online play spaces be reimagined as a crucial new form of public sphere in which children s rights and digital citizenship must be prioritized **Didactics of Microlearning** Theo Hug, 2007 This book is a comprehensive and articulate introduction to the emerging field of microlearning In public institutions in small and medium sized enterprises and in informal contexts we are all dealing with increasingly complex learning requirements more fragmented knowledge demands for greater cultural flexibility and rapid technological change As a result new approaches are required focusing on microcontent medial fluency and spaces of learning **Children and Young People's Cultural Worlds** Bragg, Sarah, Kehily, Mary Jane, 2013-10-16 Children and young people in the early twenty first century encounter and creatively adapt to a range of cultural phenomena in an increasingly mediated commercialised and globalised world Children and young people s cultural worlds offers a critical introduction to childhood in the digital age Childhood innocence is a concept that often underpins the way adults think about children and new technologies The book challenges adult concerns highlighting instead the diversity of children s experiences and relationships with each other Children s everyday activities are explored in an attempt to understand the distinctiveness of their cultural worlds The book also considers matters of difference on children s lives the consequences of age and the experience of living in different cultural contexts This is the second in a series of four books written by experts in the field which provides an introduction to childhood degree programmes and related modules The series features international case studies examples and readings to supplement the chapters and is illustrated in full colour Other books in the series are Understanding childhood a cross disciplinary approach Childhoods in context Local childhoods global issues **International Handbook of Children, Media and Culture** Kirsten Drotner, Sonia Livingstone, 2008-02-19 This essential volume brings together the work of internationally renowned

researchers each experts in their field in order to capture the diversity of children and young people's media cultures around the world Why are the media such a crucial part of children's daily lives Are they becoming more important more influential and in what ways Or does a historical perspective reveal how past media have long framed children's cultural horizons or perhaps how families however constituted have long shaped the ways children relate to media In addressing such questions the contributors present detailed empirical cases to uncover how children weave together diverse forms and technologies to create a rich symbolic tapestry which in turn shapes their social relationships At the same time many concerns even public panics arise regarding children's engagement with media leading the contributors also to inquire into the risky or problematic aspects of today's highly mediated world Deliberately selected to represent as many parts of the globe as possible and with a commitment to recognizing both the similarities and differences in children and young people's lives from China to Denmark from Canada to India from Japan to Iceland from the authors offer a rich contextualization of children's engagement with their particular media and communication environment while also pursuing cross cutting themes in terms of comparative and global trends Each chapter provides a clear orientation for new readers to the main debates and core issues addressed combined with a depth of analysis and argumentation to stimulate the thinking of advanced students and established scholars Since children and young people are a focus of study across different disciplines the volume is thoroughly multi disciplinary Yet since children and young people are all too easily neglected by these same disciplines this volume hopes to accord their interests and concerns they surely merit
