Mathematical Classification and Clustering Boris Mirkin, 2013-12-01 I am very happy to have this opportunity to present the work of Boris Mirkin a distinguished Russian scholar in the areas of data analysis and decision making methodologies The monograph is devoted entirely to clustering a discipline dispersed through many theoretical and application areas from

mathematical statistics and combinatorial optimization to biology sociology and organizational structures It compiles an immense amount of research done to date including many original Russian developments never presented to the international community before for instance cluster by cluster versions of the K Means method in Chapter 4 or uniform partitioning in Chapter 5 The author's approach approximation clustering allows him both to systematize a great part of the discipline and to develop many innovative methods in the framework of optimization problems The optimization methods considered are proved to be meaningful in the contexts of data analysis and clustering The material presented in this book is quite interesting and stimulating in paradigms clustering and optimization On the other hand it has a substantial application appeal The book will be useful both to specialists and students in the fields of data analysis and clustering as well as in biology psychology economics marketing research artificial intelligence and other scientific disciplines Panos Pardalos Series Editor
