Joosr Guide to ... the Magic of Reality by Richard Dawkins Joosr, 2015 The God Debaters Adrian
Rosenfeldt, 2022-05-04 This book examines the post 9 11 God debate in the West Through a close study of prominent English
God debaters Richard Dawkins Karen Armstrong Christopher Hitchens and Terry Eagleton Adrian Rosenfeldt demonstrates
that New Atheist and religious apologist ideas and arguments about God science and identity are driven by mythic
autobiographical narratives and Protestant or Catholic cultural heritage This study is informed by criticism of the New
Atheist polemic as being positivistic and the religious apologists as propagating sophisticated theology In both cases the God

debaters are perceived as disassociating themselves from human lived experience It is through reconnecting the God debaters intellectual ideas to their cultural and social background that the God debate can be grounded in a recognisable human reality that eludes reductive distinctions and disembodied abstractions **Negative Natural Theology** Christopher J. Insole, 2024-11-21 How can we live in harmony with the universe and not just in it What is it to feel at home in the world Some thinkers who feel the force of these questions reach for the concept of God Others do not This book asks what might be at stake in the choice of whether or not to speak about God not just in terms of abstract reasoning or arguments about God but in relation to deeper undercurrents of motivation and yearning The book is interested in sites in contemporary thinking where the concept of the divine beckons or looms but also perhaps repels or hides It asks what is at stake in the decision if it is that to talk about God and the divine or not to do so with a wide and deep curiosity about what this might include reasons and arguments certainly but also more biographical intuitive and affective dimensions including imagination and feelings about what is valuable Also relevant are unconscious drives and factors Concepts can convince or fail to convince but also they can attract and repel The book draws on both analytical and continental post Kantian sources treating individual thinkers such as Immanuel Kant William James Carl Jung Karl Rahner Albert Camus Saul Kripke Thomas Nagel Derek Parfit Karen Kilby and Janet Soskice as well as cultural movements such as modern paganism new atheism and humanism Natural theology involves speaking about God without reference to revelation tradition or sources of authority using the resources of reason alone Negative theology is concerned with the way in which a type of abstract reasoning and rational argument run out without this necessarily being an ending other types of speech and communication may become possible and essential Speaking into this space the book draws on philosophy theology anthropology literature and psychology of War Tatiana Prorokova, 2019-05-01 Historical writing and fiction are not the same thing though historians often creatively manipulate material in imposing plot structures selecting starting and ending points and fashioning compelling literary characters from historical figures In Docu Fictions of War Tatiana Prorokova argues that the opposite is also true war fiction offers a kind of history that both documents its subjects and provides a snapshot of the cultural representation of the United States most recent military involvements She covers a largely neglected body of cinematic and literary texts about the First Gulf War the Balkan War the Afghanistan War and the Iraq War to open a fresh analysis of cultural texts on war Prorokova contends that these texts are not pure fiction but docu fictions works of imagination that can document their subjects while disclosing the social political and historical link between war and culture during the last three decades Docu Fictions of War analyzes how these representational narratives have highlighted a humanitarian rationale behind American involvement in each war whether the stated goals were to free the oppressed from tyranny stop genocide or rid the world of terrorism The book explores the gap between history what allegedly happened and the cultural mythology that is both true and inexact tangible and sensed recognized and undocumented You Are (Not) a Fraud Marc Reid, 2022-08-29 This is not an imposter

Consecrating Science Lisa H. Sideris, 2017-08-15 In Consecrating Science Lisa Sideris offers a searing critique of The New Cosmology a complex network of overlapping movements that claim to bring together science and spirituality all in the name of saving our planet from impending ecological collapse Highly regarded in many academic circles these movements have been endorsed by numerous prominent scholars scientists historians and educators Their express goal popularized in numerous books films TED talks YouTube videos podcasts and even introductory courses at places like Harvard or Washington University is to instill in readers and audiences a profound sense of being at home in the universe thereby fostering environmentally responsible behavior Whether promoted as The New Story The Universe Story or The Epic of Evolution they all offer humanity a new sacred story a common creation myth for modern times and for all people the evolutionary unfolding of the universe from the Big Bang to the present Evolutionary science and religious cosmology

together at last But as Sideris shows however the New Cosmology actually underwrites a staggeringly anthropocentric vision of the world Instead of cultivating an ethic of respect for nature the project of consecrating science only increases human arrogance and indifference to nonhuman life Going back to the work of Rachel Carson and other naturalists the author shows how a sense of wonder rooted in the natural world and our own ethical impulses helps foster environmental attitudes and policies that protect our planet Provided by publishe Big History, Small World Cynthia Stokes Brown, 2016-12-30 The newest way to think about the universe becomes engaging and personal in Big History Small World From the Big Bang to You by Cynthia Stokes Brown Her clear introduction to big history divided into eight thresholds of time is the perfect starting point for any reader intrigued by this rich blend of history and science Big History Small World is also the first book about big history specifically designed to be used in high school courses and with the free curriculum available from the Big History Project cofounded by Bill Gates and David Christian Big History Small World is organized into twelve chapters In the first chapter Brown discusses the scientific method In the last chapter she discusses the different ways people interpret big history and find meaning in it The other ten chapters are based on eight major turning points or thresholds in the cosmic story One threshold the emergence of life gets two chapters while a discussion of the future fills chapter eleven This book is not formatted as a traditional textbook although it can easily be used as one Each chapter has questions on the frontier of knowledge as well as suggestions of how the content applies directly to the reader to answer the perennial question Why do I have to learn this There are illustrations charts diagrams a glossary and timeline and short biographies of scientists and historians who have been influential in developing big history Cynthia Stokes Brown has taught world history in high school and trained high school teachers at Dominican University of California where she piloted big history courses and helped initiate the big history program now required for all freshmen She is the author of the general interest book on big history Big History From the Big Bang to the Present New York New Press 2nd ed 2012 and also wrote a university level textbook with David Christian and Craig Benjamin Big History Between Nothing and Everything New York McGraw Hill 2014 She is a founding member of the International Big History Association and associate editor of its publication Origins Image Wesley J.
