Research Anthology on Cross-Industry Challenges of Industry 4.0 Management Association, Information Resources, 2021-02-05 As Industry 4.0 brings on a new bout of transformation and fundamental changes in various industries the traditional manufacturing and production methods are falling to the wayside

Industrial processes must embrace modern technology and the most recent trends to keep up with the times. With smart factories, the automation of information and data, and the inclusion of IoT, AI, robotics, and cloud computing, come new challenges to tackle. These changes are creating new threats in security, reliability, the regulations around legislation, and standardization of technologies, malfunctioning devices, or operational disruptions, and more. These effects span a variety of industries and need to be discussed. Research Anthology on Cross Industry Challenges of Industry 4.0 explores the challenges that have risen as multidisciplinary industries adapt to the Fourth Industrial Revolution. With a shifting change in technology, operations management, and business models, the impacts of Industry 4.0 and digital transformation will be long-lasting and will forever change the face of manufacturing and production. This book highlights a cross-industry view of these challenges, the impacts they have, potential solutions, and the technological advances that have brought about these new issues. It is ideal for mechanical engineers, electrical engineers, manufacturers, supply chain managers, logistics specialists, investors, managers, policymakers, production scientists, researchers, academicians, and students looking for cross-industry research on the challenges associated with Industry 4.0.

Business Management and Communication Perspectives in Industry 4.0 Özbebek Tunç, Aytegin Aslan, Pinar, 2019-07-26. Changes in the global economy bring new dynamics, concepts, and implications that require digitalization and adaptation. The new normal has changed, and companies must adopt such strategies if they want to survive in the ever-changing business environments. *Business Management and Communication Perspectives in Industry 4.0* is a pivotal reference source that provides vital research on the planning, implementing, and evaluating of strategies for the new industry standards. While highlighting topics such as artificial intelligence, digital leadership, and management science, this publication theorizes about tomorrow's business and communication environments based on the past and present of the concepts. This book is ideally designed for managers, researchers, educators, students, professionals, and policymakers seeking current research on blending managerial and communicational concepts with a multidisciplinary approach.

Conflict in Family Businesses Josiane Fahed-Sreih, 2017-08-01. This book presents methods for dealing with conflict in family firms. The first part of the book defines conflict in general and then in the context of family businesses. It then identifies several approaches to dealing with conflict. As the author makes clear, conflict can negatively impact the performance of a family firm, while unresolved conflict often results in unsuccessful transition to the next generation. Therefore, she presents a model that looks at the causes of conflict and ways of resolving it. The second part of the book presents case studies of conflicts in family business, examining such companies as Gucci and L'Oréal, and applying the theory. This book will serve as a foundational text in managing disputes in family enterprises.

Rethinking Culture David White, 2017-03-31 Organizational or corporate culture is the most overused and least understood word in business if not society While the topic has been an object of keen academic interest for nearly half a century theorists and practitioners still struggle with the most basic questions What is organizational culture Can it be measured Is it a dependent or independent variable Is it causal in organizational performance and if so how Paradoxically managers and practitioners ascribe cultural explanations for much of what constitutes organizational behavior in organizations and moreover believe culture can be engineered to their own designs for positive business outcomes What explains this divide between research and practice While much academic research on culture is challenged by ontological epistemic and ethical difficulties there is little empirical evidence to show culture can be deliberately shaped beyond espoused values The gap between research and practice can be explained by one simple reason the science and practice of culture has yet to catch up to managerial intuition Managers are correct in suspecting culture is a powerful normative force but until now current theory and research is not able to adequately account for cultural behavior in organizations Rethinking Culture describes and presents evidence for a new framework of organizational culture based on the cognitive science of the so called cultural mind It will be of relevance to academics and researchers with an interest in business and management organizational culture and organizational change as well as cognitive and cultural anthropologists and sociologists interested in applications of theory in organizational and institutional settings

Understanding College and University Organization James L. Bess, Jay R. Dee, 2023-07-03 Now available in paperback this two volume work is intended to help readers develop powerful new ways of thinking about organizational principles and apply them to policy making and management in colleges and universities The book is written with two audiences in mind administrative and faculty leaders in institutions of higher learning and students both doctoral and Master's degree studying to become upper level administrators leaders and policy makers in higher education It systematically presents a range of

theories that can be applied to many of the difficult management situations that college and university leaders encounter. It provides them with the theoretical background to knowledgeably evaluate the many new ideas that emerge in the current literature and in workshops and conferences. The purpose is to help leaders develop their own effective management style and approaches and feel confident that their actions are informed by appropriate theory and knowledge of the latest research in the field. Without theory, organizational leaders are forced to treat each problem that they encounter as unique as if it were a first time occurrence. While leaders may have some experience with a particular issue, their solutions are usually not informed by the accumulated wisdom of others who have already encountered and resolved similar situations. The authors approach the theory of the organization and administration of colleges and universities from three quite different perspectives or paradigms, each relying on different assumptions about the reality of organizational life in colleges and universities. The positivist paradigm, primarily an omnibus systems theory, integrates the chapters into a comprehensive yet easily accessible whole. Social constructionism, the second paradigm, is introduced in each chapter to illuminate the difficulty of seeking and finding meaningful consensus on problems and policies while also addressing important ethical issues that tend to be overlooked in leadership thought and action. The third paradigm, postmodernism, draws attention to difficulties of logic and communication under the constraints of strictly linear thinking that authorities at all levels attempt to impose on organizations. This multiple paradigm approach enables readers to become more cognizant of their own assumptions, how they may differ from those of others in their organization, and how those differences may both create difficulties in resolving problems and expand the range of alternatives considered in organizational decision making. The book offers readers the tools to balance the real world needs to succeed in today's challenging and competitive environment with the social and ethical aspirations of all its stakeholders and society at large. The authors' aim is to elucidate how administration can be made more efficient and effective through rational decision making while also respecting humanistic values. This approach highlights a range of phenomena that require attention if the institution is ultimately to be considered successful. Also available Volume 1: The State of the System. Two volume set.
