Development Program, Many readers undoubtedly have run crosscut saws in the past and a lot of you know the difference  
between a good running saw and a poorly filed one A poorly filed saw deserves the name I have often heard attributed to it  
misery whip A well filed saw however is efficient and can be satisfying to use Only in recent years was a chain saw developed  
that could beat a topnotch buckler in a contest There is a record of a 32 inch Douglas fir log cut in 1 minute 26 5 seconds by  
one buckler Saw filers of any quality are becoming very difficult if not impossible to find This manual was written so those of  
you who use crosscut saws can maintain them yourselves and overcome some of the misery of that ol whip The manual  
provides a basic description of how and why a crosscut saw works tips on building a saw vise and some experience tested  
methods as a guide for achieving a well running saw Only saws having raker teeth are discussed because they are by far the  
most common saws found today This includes lance perforated lance and champion tooth patterns      **Working with**
