The Art of Survival Joseph Chikowero, Anna Chitando, Angeline M. Madongonda, Government Phiri, 2015-11-25 *The Art of Survival: Depictions of Zimbabwe and the Zimbabwean in Crisis* offers a fresh interdisciplinary examination of a period against which development in Zimbabwe is often measured: one epitomized by the severe shortages and runaway inflation of 2008. While journalistic stories of the 1998-2008 era often privilege the reductive stories of woe, defeat and crushed hopes, this volume explores how survival was still possible in those circumstances. The book offers insights into how ordinary Zimbabweans battled the odds by making startling innovations in language use to legitimize new survival strategies; how they weaved new songs and reinterpreted old ones to fight for survival; how social institutions such as churches reinterpreted popular gospel; and how authors, playwrights and dramatists crafted works that acknowledge the unprecedented difficulties and yet find humour, laughter and love in unusual places. This work will appeal to both scholars who will appreciate the depth of the analysis and the general reader.

The African Mother Tongue and Mathematical Ideas Abdul Karim Bangura,2020-06-02 This book by renowned scholar Dr Abdul

Karim Bangura combines linguistics and mathematics to show how and why African centred mathematical ideas can be a driving force in Africa's development efforts. Bangura explores the concept that Africa has been the centre of the History of Mathematics for thousands of years as the civilizations that emerged across the continent developed contributions which would enrich both ancient and modern understanding of nature through mathematics. However, scholars and other professionals working in the field of mathematics education in Africa have identified a plethora of issues in carrying out their tasks. This is highlighted by one of the most compelling arguments in the book which is that a major reason for these problems is the fact that the African mother tongues have been greatly neglected in the teaching of mathematics in the continent. Bangura asserts that a change has to be made in order for Africa to benefit from the exceptional opportunities mathematics offer, showing that even if there is a great body of work connecting linguistics and mathematics, few analyses have been performed on the link between African languages and mathematics and the ones that have been made are not theoretically grounded on linguistics. Thus, the book begins by identifying the objects of study of linguistics and mathematics and delineates which ones they have in common. Next, since the object of study of linguistics is language, the nine design features of language are employed to examine each of the objects as it pertains to African languages. After that, mathematical ideas of sustainability and those of tipping points are suggested as means to help Africa's development efforts.

Equity, Opportunity and Education in Postcolonial Southeast Asia Cynthia Joseph, Julie Matthews, 2014-07-17. Equity, Opportunity and Education in Postcolonial Southeast Asia addresses the ways in which colonial histories, nationalist impulses and forces of globalization shape equity and access to education in Southeast Asia. Although increasingly identified as a regional grouping, ASEAN (Malaysia, Indonesia, Burma, Thailand, Singapore and the Philippines) are known for their vastly different state structures, political regimes, political economies and ethnocultural and religious demography. The expert contributors to this volume investigate educational access and equity for citizens, ethnic and religious minorities and indigenous people within these countries. The subject of education is framed within the broader national and local challenges of achieving equity and social justice. This book examines the dimensions of post-colonialism, nationalism and globalisation as played out within different international educational contexts. Chapters include: Understanding the Cultural Politics of Southeast Asian Education through Postcolonial Theory; Downplaying Difference: Representations of Diversity in Contemporary Burmese Schools and Educational Equity; Learner-Centered Pedagogy in Post-Conflict Timor-Leste: For the Benefit of the Learner or the Learned; Technology of Dominance: Technology of Liberation Education in Colonial and Postcolonial Cambodia; Change and Continuity in the History of Vietnamese Higher Education; Colonization by Stealth: The Case of Thailand; Education Politics in Postcolonial Malaysia; Ethnicity, Difference and Inequalities: The Singapore Education Journey From Colonialism to Globalism.
