International Handbook of Mathematical Learning Difficulties Annemarie Fritz,Vitor Geraldi Haase,Pekka Räsänen,2019-01-30 This comprehensive volume provides teachers researchers and education professionals with cutting edge knowledge developed in the last decades by the educational behavioural and neurosciences integrating cognitive developmental and socioeconomic approaches to deal with the problems children face in learning mathematics The neurocognitive mechanisms and the cognitive processes underlying acquisition of arithmetic abilities and their significance for education have been the subject of intense research in the last few decades but the most part of this research has been conducted in non applied settings and there s still a deep discrepancy between the level of scientific knowledge and its implementation into actual educational settings Now it s time to bring the results from the laboratory to the classroom Apart from bringing the theoretical discussions to educational settings the volume presents a wide range of methods for early detection of children with risks in mathematics learning and strategies to develop effective interventions based on innovative cognitive test instruments It also provides insights to translate research knowledge into public policies in order to address socioeconomic issues And it does so from an international perspective dedicating a whole section to the cultural diversity of mathematics learning difficulties in different parts of the world All of this makes the International Handbook of Mathematical Learning Difficulties an essential tool for those involved in the daily struggle to prepare the future generations to succeed in the global knowledge society

Integration of Nature and Technology for Smart Cities Anil Ahuja,2016-03-17 This book is a resumption of the work Integrated M E Design Building Systems Engineering published by Anil Ahuja in 1997 Together with an international group of authors from the engineering urban planning and architecture fields Mr Ahuja discussed new trends and paradigms in the smart buildings and smart city sectors and extended the topic of the previous publication from the building to the entire city A smart sustainable building is not just about the building itself There are things happening in the inside of the building and on the outside A smart building connects the inside with the outside provides efficiencies on both sides synchronizes the outside infrastructure with its inside systems and integrates nature and its occupants in its design A smart building doesn t just provide technology solutions It is about constant exchange between the inside and the outside of the building the contribution of the building to the quality of the entire neighborhood and the rest of the city how the smart building can connect people in a sharing community and how technology can be the key to make it happen

Youth and Skills ,2012-01-01 Many young people around the world especially the disadvantaged are leaving school without the skills they need to thrive in society and find decent jobs As well as thwarting young people s hopes these education failures are jeopardizing equitable economic growth and social cohesion and preventing many countries from reaping the potential benefits of their growing youth populations The 2012 Education for All Global Monitoring Report examines how skills development programmes can be improved to boost young people s opportunities for decent jobs and

and Environment Ram Swaroop Meena, Sandeep Kumar, Jitendra Singh Bohra, Mangi Lal Jat, 2019-10-02 Fertilizers have been used extensively around the globe since the Green Revolution due to the high subsidies. However, extensive fertilizer use exacerbates soil degradation and causes yield stagnation and as a result threatens food security and soil sustainability especially in developing countries. This means that sustainable soil and environmental management are vital to provide food and nutritional security for present and future generations. This has led to the International Union of Soil Science (IUSS) declaring 2015-2024 the International Decade of Soils. This book focuses on the impact of sustainable management of soil and environment on improving the functioning of soil ecosystems and agronomic productivity and also discusses food security, nutrient cycling, recent advances in INM technologies, eco-friendly cultivation, agricultural practices to reduce greenhouse gas (GHG) emissions as well as conservation agriculture and its effects and strategies for soil sustainability. Offering a comprehensive overview of management in the context of the sustainability of soil and the agroecosystems that it supports, it demonstrates the options available and provides insights into restoring soil health and matching soil nutrient supply with crop demand to ensure nutritional security in an eco-friendly environment. Strategic Role of Tertiary Education and Technologies for Sustainable Competitive Advantage Ordóñez de Pablos, Patricia, Tennyson, Robert D., 2013-06-30 Strategic Role of Tertiary Education and Technologies for Sustainable Competitive Advantage explores how education enables social and economic development through the targeted training of human capital and the evaluation and dissemination of knowledge resources across generations. This book provides entrepreneurs, leaders, policy makers, and educators with the necessary tools to make the most of higher education in order to meet emerging economic and social challenges through the use of new technologies enabling effective collaboration and knowledge sharing. Handbook of Research on Theoretical Perspectives on Indigenous Knowledge Systems in Developing Countries Ngulube, Patrick, 2016-09-12 There has been a growth in the use, acceptance, and popularity of indigenous knowledge. High rates of poverty and a widening economic divide is threatening the accessibility to western scientific knowledge in the developing world where many indigenous people live. Consequently, indigenous knowledge has become a potential source for sustainable development in the developing world. The Handbook of Research on Theoretical Perspectives on Indigenous Knowledge Systems in Developing Countries presents interdisciplinary research on knowledge management, sharing, and transfer among indigenous communities. Providing a unique perspective on alternative knowledge systems, this publication is a critical resource for sociologists, anthropologists, researchers, and graduate-level students in a variety of fields. **Handbook of Research on Creating Spaces for African Epistemologies in the Inclusive Education Discourse** Maguvhe, Mbulaheni Obert, Masuku, Mfundo Mandla, 2021-12-31 Students with disabilities who are not able to perform to the best of their abilities often find themselves learning in inaccessible environments and subjected to increased stress levels due to the haphazard provisioning of education characterized by physical, communicative, and unsuitable teaching and learning approaches. Very often, this is a result of

various shortcomings including unfair assessment practices Misconceptions and a lack of knowledge with regard to the implementation of inclusive education detract from the successful admission of students with disabilities and their retention and active participation The Handbook of Research on Creating Spaces for African Epistemologies in the Inclusive Education Discourse explores the concept of inclusive education in an African context It advocates for the monitoring and evaluation of inclusive education and proposes interventions where reasonable accommodation or lack of accessibility is a reason for students with disabilities to not benefit from this system Covering topics such as barriers to learning rural schools and student support this major reference work is an essential resource for administrators advocates for students with disabilities policymakers researchers pre service teachers educators academicians and students *Who's Who in Science and Engineering 2008-2009* Who's Who Marquis, Marquis Who's Who, 2007-12 **Optimizing Regional Development**
