essential resource for anyone interested in improving STEM education in underserved communities **Civil Society and Peacebuilding in Sub-Saharan Africa in the Anthropocene** Jean Chrysostome K. Kiyala, Geoff Thomas Harris, 2022-04-22

This book examines civil society's peacebuilding role in sub-Saharan Africa in the context of climate change and the pursuit of environmental peace and justice in the Anthropocene. Five main research themes emerge from its 20 chapters: The roles of environmental peacemaking, environmental justice, ecological education and eco-ethics in helping to mitigate the impacts of climate change; Peacebuilding by CSOs after violent conflicts with particular reference to accountability, reconciliation and healing; CSO involvement in democratic processes and political transition after violent conflicts; Relationships between local CSOs and their foreign funders and the interactions between CSOs and the African Union's peace and security architecture; The particular role of faith-based CSOs. The book underlines the centrality of dialogue to African peacebuilding and the indigenous wisdom and philosophies on which it is based. Such wisdom will be a key resource in confronting the existential challenges of the Anthropocene. The book will be a significant resource for researchers, academics and policymakers concerned with the challenge of climate change, its interactions with armed conflict and the peacebuilding role of CSOs. This pathbreaking book shows why peacebuilding analysis and efforts need to be urgently re-oriented towards the existential challenges of environmental peace and justice. It explains the emerging conceptual frameworks which are needed for this new role. It explains the critical role that CSOs, local and international, will play in implementing this new peacebuilding approach with particular reference to sub-Saharan Africa.

Waste Problems and Management in Developing Countries Umair Riaz, Shazia Iqbal, Moazzam Jamil, 2023-06-23

This new volume offers effective solutions to the mismanagement of waste, particularly in developing countries, by providing an understanding of different types of wastes, their generation and use of advanced technologies for waste management and by focusing on integrating the technical and regulatory complexities of waste management. It provides a comprehensive overview of the characterization issues and regulatory development of waste management for sustainable solutions and prevention techniques. Covering the various types of pollution, including pollution from plastics, industrial activities, metals, livestock, healthcare, food loss and waste, etc., the book explores new techniques for thermal and radioactive waste management and includes such methods as vermicomposting and composting for organic waste management and profitable use. The volume also looks at the role of modern technologies and legislation measures to manage biosolid waste. Numerous data sets obtained from various surveys are included, and special categories of waste that may not fit precisely into either RCRA Subtitle D solid wastes or Subtitle C hazardous wastes are discussed as well.
