First Ben Fine charts the ways in which the theoretical understanding of the British coal industry has changed over the past two centuries and discusses the arguments surrounding public ownership versus the privatization of the industry In the second part the book presents a critical assessment of the existing literature and challenges the well established orthodoxies by close theoretical and empirical argument Finally attention is paid to the role of landed property and the processes of technical change An interesting analysis of the complex relationship between industrial change and political economy and an important contribution to economics this study will be of great value to students of the theory and history of industrial change and the British coal industry

How China is Reshaping the Global Economy Rhys Jenkins, 2022-06-16 China's growing economic involvement in Sub Saharan Africa and Latin America has been a source of major controversy The official Chinese position maintains that the growth of bilateral relations is of mutual benefit and provides a good example of South South cooperation Critics on the other hand see the economic relations between China and other developing countries as highly unequal with most of the benefits accruing to China and a few local elites They also point to negative socio economic political and environmental consequences How China is Reshaping the Global Economy Development Impacts in Africa and Latin America throws more light on these controversies through a comparative study of China's impact on the two regions It looks not just at bilateral relations between China and the two regions but also analyses the changes in the global economy brought about as a result of the shift in economic activity from North America and Western Europe to Asia This book looks at the factors which led to rapid economic growth in China and the way in which this has affected global manufacturing commodity markets the international presence of Chinese companies and financial flows It examines the different forms of Chinese economic involvement in Sub Saharan Africa and Latin America the main drivers and economic social political and environmental consequences It ends with a comparison of the two regions that highlights the importance of different histories and political and institutional contexts in determining the impacts of China Since the first edition of How China is Reshaping the Global Economy Development Impacts in Africa and Latin America China's role in the global economy has continued to expand and the Chinese government's foreign policy has become more assertive The global presence of China has been marked by the expansion of the Belt and Road Initiative to almost 150 countries and the trade war between the US and China as well as increased Western concerns over the activities of major Chinese companies such as Huawei This new edition documents these changes and their implications for SSA and LAC

Agriculture, Autonomous Development, and Prospects for Industrialization in Africa Emmanuel Ndhlovu, 2025-03-06 The book investigates the intersection of agriculture and development in Africa and how it impacts rural industrialisation prospects It provides a comprehensive view of the position of agriculture in African socio economic activities and the agricultural sector's potential as the source for continental development and industrialisation prospects Significant research has been done on African development with a focus placed on the problematic role played by slavery colonialism and later by incompetent African leaders who failed to

steer development of the type that delivers a progressive sustained and sustainable transformation of lives and societies There is limited focus on the possibility of agriculture being the potential basis of African development and the chance for industrialisation This is a matter of concern considering the dominance of agriculture as a livelihood and income source for many people on the continent In contributing to the debate on development in Africa this book aims to show how agriculture can serve as the basis for African development and industrialisation This will be achieved by i providing a detailed historical description of the position of agriculture in African socio economic activities ii outlining the trajectory of African development with a focus on agriculture innovation and mechanisation iii identifying challenges to the development of African agriculture iv exploring the opportunities for agricultural development in Africa and v providing practical and policy recommendations to improve African agriculture and make it the engine for development and industrialisation Utilising a multidisciplinary approach which combines political economy social policy financial inclusion and empowerment approaches the book also shows how engagement of youth and women digitalisation and the provision of support by public and private actors can jump start agriculture as the engine of African development and industrialisation Taken together with this conscious effort to promote a multi disciplinary discussion the book is valuable reading for students policymakers and activists interested in emerging new directions in African development thinking and research

African Land Questions, Agrarian Transitions and the State Sam Moyo, 2008 This empirically grounded study provides a critical reflection on the land question in Africa research on which tends to be tangential conceptually loose and generally inadequate It argues that the most pressing research concern must be to understand the precise nature of the African land question its land reforms and their effects on development To unravel the roots of land conflicts in Africa requires thorough understanding of the complex social and political contradictions which have ensued from colonial and post colonial land policies as well as from Africa s development and capital accumulation trajectories especially with regard to the land rights of the continent s poor The study thus questions the capacity of emerging neo liberal economic and political regimes in Africa to deliver land reforms which address growing inequality and poverty It equally questions the understanding of the nature of popular demands for land reforms by African states and their ability to address these demands under the current global political and economic structures dictated by neo liberalism and its narrow regime of ownership The study invites scholars and policy makers to creatively draw on the specific historical trajectories and contemporary expression of the land and agrarian questions in Africa to enrich both theory and practice on land in Africa
