Oracle Inventory Technical Reference Manual:

Oracle e-Business Consultancy Handbook John Priestley, 2012-04-01 This book is based on my experiences as a consultant over a period of thirteen years the first four of them working for Oracle In those years I had the titles Manufacturing and Financials Consultant on different sites The essays in this book are largely designed to cover the more complex areas of the system including intercompany and internal sales orders outside processing and consignment stock They also cover procedures which may be needed in every factory how to check stock or how to investigate stock losses The SQL scripts to give easy to use reports which can be downloaded into Excel So many Oracle reports are difficult to use especially where there is a lot of data The SQL scripts also deal with the problems which occur after a site has gone live such as clearing up ahead of the inventory monthend Some queries notably in BOM and Routing validate data *PTIPS Database Applications*
