## **Strategic Xml W Scott Means:**

**Strategic XML** W. Scott Means, 2002 This book is primarily designed to describe the landscape of a typical large enterprise in terms of where XML can be successfully adopted as a data format The examples give almost equal time to MS and non MS applications reflecting the increasingly mixed nature of development in large companies      **Dictionary of XML Technologies and the Semantic Web** Vladimir Geroimenko, 2012-12-06 The emerging Second Generation Web is based entirely on XML and related technologies It is intended to result in the creation of the Semantic Web on which computers will be able to deal with the meaning semantics of Web data and hence to process them in a more effective and autonomous way This new version of the Web introduces a multitude of novel concepts terms and acronyms Purpose Scope and Methods This dictionary is an effort to specify the terminological basis of emerging XML and Semantic Web technologies The ultimate goal of this dictionary is even broader than just to define the meaning of new words it aims to develop a proper understanding of these leading edge technologies To achieve this comprehensive definitions of technical terms are supported by numerous diagrams and code snippets clearly annotated and explained The main areas covered in this dictionary are 1 XML syntax and core technologies such as Namespaces Infoset and XML Schema 2 all the major members of the XML family of technologies such as XSLT XPath and XLink 3 numerous XML based domain specific languages such as NewsML News Markup Language 4 the concept and architecture of the Semantic Web 5 key Semantic Web technologies such as RDF Resource Description Framework RDF Schema and OWL Web Ontology Language and 6 Web services including WSDL Web Services Description Language and SOAP Simple Object Access Protocol      *Sams Teach Yourself XML in 24 Hours* Michael Morrison, 2002 This manual shows what can be done with XML while also teaching where the technology is headed It includes topics like displaying XML files in HTML files performing queries in XSL and building an online store

**Broadband Services, Applications, and Networks** International Engineering Consortium, 2002-12 Focusing on the most promising broadband applications and services and the business strategies that are most viable to ensure favorable return on investment this report is authored by industry professionals and examines the current and potential markets for a range of broadband applications and services and offers business strategies that providers can adopt to help ensure profitability Detailed case studies from service providers around the world also provide invaluable insights into the challenges and opportunities present in today's global broadband industry This report is an important resource for any communications company that hopes to profit from the evolutions in broadband applications and services      *XML and Web Technologies for Data Sciences with R* Deborah Nolan, Duncan Temple Lang, 2013-11-29 Web technologies are increasingly relevant to scientists working with data for both accessing data and creating rich dynamic and interactive displays The XML and JSON data formats are widely used in Web services regular Web pages and JavaScript code and visualization formats such as SVG and KML for Google Earth and Google Maps In addition scientists use HTTP and other network protocols to

scrape data from Web pages access REST and SOAP Web Services and interact with NoSQL databases and text search applications This book provides a practical hands on introduction to these technologies including high level functions the authors have developed for data scientists It describes strategies and approaches for extracting data from HTML XML and JSON formats and how to programmatically access data from the Web Along with these general skills the authors illustrate several applications that are relevant to data scientists such as reading and writing spreadsheet documents both locally and via Google Docs creating interactive and dynamic visualizations displaying spatial temporal displays with Google Earth and generating code from descriptions of data structures to read and write data These topics demonstrate the rich possibilities and opportunities to do new things with these modern technologies The book contains many examples and case studies that readers can use directly and adapt to their own work The authors have focused on the integration of these technologies with the R statistical computing environment However the ideas and skills presented here are more general and statisticians who use other computing environments will also find them relevant to their work Deborah Nolan is Professor of Statistics at University of California Berkeley Duncan Temple Lang is Associate Professor of Statistics at University of California Davis and has been a member of both the S and R development teams
