Chikweche,2015-12-01 Over the past years few African countries have been the focus of discussions and analyses generating a vast array of literature as much as Zimbabwe The socioeconomic and political crises since the turn of the century have deeply transformed the country from the ideals of a vibrant freshly independent nation just two decades earlier These transformations have necessitated the call for the restructuring of Zimbabwean society polity and economy But this literature remains exclusively within the realm of academic thinking and theorising with no concerted effort to move beyond this by explicitly drawing out the policy implications Beyond the Crises Zimbabwes Prospects for Transformation is a welcome addition to the academic and policy literature with a much broader and all embracing focus in terms of policy interventions By focusing on different aspects of social and economic justice Murisa and Chikweche go beyond initiating a broad discussion on these two key pillars of human development with a view to suggesting possible future directions of practical solutions and policy development for the attainment of inclusive social and economic justice for Zimbabweans **Human Development**

The Land Reform Deception Alexander Charles Laurie, 2016 The Land Reform Deception looks at a particularly contentious period in Zimbabwe's recent history from 2000-2008 when the government seized commercial farms using illegal and violent methods against a largely unarmed population of farmers and farm workers Robert Mugabe's government began the seizures on a small targeted scale in an effort to suppress political opposition groups but they soon escalated into an out of control frenzy targeting all farms in the country The state claimed that the seizures occurred in response to a public cry for land redistribution and to rectify colonial era injustices and were part of a structured land reallocation program Yet land was often distributed ad hoc to those with little or no farming experience As a result agricultural output contracted and inflation and unemployment rose dramatically in what became a social and economic disaster for the country In The Land Reform Deception Charles Laurie asks why the state would target its own agricultural industry using such violent methods and risk such dire consequences He also seeks to uncover the major actors and their motivations and strategies Laurie argues that the seizure of the most valuable farms was largely carried out by politically influential individuals for financial and political gain rather than to address historical injustices In fact he finds that the scale on which the farm invasions were carried out and the violent methods used were never part of a planned government land policy Indeed Laurie shows that Mugabe initially opposed the seizures knowing that they would wreck the economy only to later support them in order to appease his supporters and retain political power Incorporating unprecedented empirical evidence gathered from in depth interviews with senior politicians members of the secretive Central Intelligence Organization the military and police along with farmers and farm workers who were targeted during the invasions The Land Reform Deception strips away official explanations and delves into the political and economic drivers that triggered the seizure of commercial farms in Zimbabwe

Building from the Rubble Lloyd Sachikonye, Brian Raftopoulos, 2018-09-23 Building from the Rubble is the latest volume to trace the history of Zimbabwe's labour movement following Keep on Knocking 1997 and Striking Back 2001 Even though it focuses on the period between 2000-2017 the analysis reviews the changes in trade unionism throughout the post colonial era For much of this period the unions faced massive challenges including state violence and repression funding limitations splits factionalism and problems of organising at factory level Perhaps the greatest challenge was the massive structural change in the economy Deindustrialisation and the informalisation of work decimated the potential membership of the unions and redefined the trajectory of the movement The growing precarity of work and the loss of formal employment placed the future of trade

unions in great jeopardy Notwithstanding these challenges the importance of the labour movement continued to resonate with workers The editors conclude that the unions needs to reconnect with their social base at the workplace and rebuild structures and alliances in the informal economy the rural sector and with residents associations and social media movements This they write is a critical post Mugabe agenda that should be seized by the labour movement at all levels from shop floor to district regional and national spaces
