Zimsec June 2014 Intergrated Science Paper:

Validating Technological Innovation David Coniam, Peter Falvey, 2016-04-02 This book discusses Hong Kong's use of onscreen marking OSM in public examinations. Given that Hong Kong leads the way in OSM innovation, this book has arisen from a recognised need to provide a comprehensive coherent account of the findings of various separate but linked validation studies of onscreen public examinations in Hong Kong. The authors discuss their experience of the validation process, demonstrating how high stakes innovation should be fully validated by a series of research studies in order to satisfy key stakeholders.

Sustainable Development in Africa Walter Leal Filho, Rudi Pretorius, Luiza Olim de Sousa, 2021-07-09 This book serves the purpose of documenting and promoting African experiences on sustainable development which encompasses both formal and non-formal education. Sustainable development is very important to Africa, but there is a paucity of publication which documents and promotes experiences from African countries. Due to their complexity, the interrelations between social, economic and political factors related to sustainable development, especially at universities, need to be better understood. There is also a real need to showcase successful examples of how African institutions are handling their sustainability challenges. It is against this background that this book has been produced. It is a truly interdisciplinary publication useful to scholars, social movements, practitioners and members of governmental agencies and private companies undertaking research and/or executing projects focusing on sustainability from across Africa. As African nations strive to pursue the UN Sustainable Development Goals, it is imperative to cater for the information needs seen across the continent and foster the dissemination of experiences and case studies which may support both on-going and future efforts. The scope of the book is deliberately kept wide and we are looking for contributions across the spectrum of sustainable development from business and economics to arts and fashion, administration, environment, languages and media studies.

Social-Ecological Systems (SES) Mohamed Behnassi, Himangana Gupta, Mahjoub El Haiba, Gopichandran Ramachandran, 2021-07-12 This book contributes to the multidisciplinary debate about social ecological systems (SES) within the perspective of rethinking the nature of interaction between these systems, especially in the Anthropocene Era. Most chapters either deliberate on risk dynamics threatening current SES or stimulate thought processes to manage such risks and related negative implications. After analyzing the main drivers of SES vulnerability, the book highlights the shifts to be made to enhance the sustainability and resilience of these systems, mainly the integration and restructuring of governance frameworks, the reorganization of production and consumption systems far from conventional models based on consumerism, the elaboration of mitigation, adaptation and SDGs implementation measures from a co-benefit perspective and the consideration of appropriate approaches and paradigms while elaborating and implementing response mechanisms. This volume is relevant to researchers, experts, students, practitioners and decision makers from different scales and spheres.

Military Integration during War-to-Peace Transitions Lesley Anne Warner,2023-06-07 In the 1960s only 10% of peace agreements included some element of political military accommodation namely military integration From Burundi to Bosnia to Zimbabwe that number had increased to over 50% by the 2000s However relatively little is understood about this dimension of power sharing often utilized during war to peace transitions Through an examination of the case of South Sudan between 2006 and 2013 this book explores why countries undergoing transitions from war to peace decide to integrate armed groups into a statutory security framework This book details how integration contributed to short term stability in South Sudan allowing the government to overcome wartime factionalism and consolidate political military power prior to the referendum on self determination in 2011 It also examines how the integration process in South Sudan was flawed by its open ended nature and lack of coordination with efforts to right size the military and transform the broader defense sector and how this led the military to fragment during periods of heightened political competition Furthermore the book explains why integration ultimately failed in South Sudan and identifies the wider lessons that could be applied to current or future war to peace transitions This book will be of great interest to students of war and conflict studies peacebuilding post conflict reconstruction African security issues and International Relations in general as well as to practitioners **Sustainability in Developing Countries** Susan Osireditse Keitumetse,Luc Hens,David Norris,2020-10-08 This book illustrates an alternative
