**International Handbook of Urban Education** William T. Pink, George W. Noblit, 2008-09-03 It is evident that urban education has become the central focus of educators at the present time In the U S for example almost one third of all school age children attend schools in large urban school districts It is in these urban schools where the diversity of cultures and languages is highest and where student learning is most problematic What has emerged from recent work to improve urban schools is the insight that there is no one size fits all panacea Rather we have discovered that the local context shapes in critically important ways what will be effective at the school level The universality of the problematics with urban education together with the importance of understanding the local or situated context of improvement interventions brings into sharp focus the importance and timeliness of an undertaking like the International Handbook of Urban Education An important focus of the International Handbook of Urban Education will be the interrogation of both the social and political factors that lead to different problem posing and subsequent solutions within each region An important question to be answered for example is what it takes in terms of resources political will and policy actions to improve urban education Zimbabwe Journal of Educational Research ,2005 Resilience Under Siege Ezra Chitando, Munyaradzi Nyakudya, Government Phiri, 2016-04-26 This volume explores the challenges and solutions experienced within Zimbabwe s economic and social spheres with particular reference to the crisis years 2000 2008 and the promising turn 2009 2012 This latter phase was prompted by the formation of the Government of National Unity GNU The contributors to the volume pay attention to how individuals and institutions sought to respond to the crisis critiquing the reactions of various actors and exploring solutions to the various challenges that were experienced Chapters in this book include reviews of agricultural subsidies a gendered approach to poverty the collapse of service delivery including a particular focus on education the look East policy the expansion of the religious sector and the experiences of Zimbabwean migrants in South Africa Underlying these contributions are the concepts of resilience and agency The authors all highlight the massive challenges that individuals and institutions had to navigate and acknowledge the creativity deployed in such quests This book will appeal to scholars in economics history and economic history religious studies education and political science as well as the general reader
