Digital Activism in Zimbabwe Tenford Chitanana,2024-10-21 This book investigates the role of the internet and social media in political processes in non western and non democratic contexts Using Zimbabwe as a case study the book demonstrates how activists and ordinary people deploy social media particularly Facebook to subvert an enduring hegemonic state However the book also highlights how authoritarian regimes are in turn learning and adapting to the information age challenging the impact of digital activism Studies of digital activism

in the Global South are often centred around democracy but this book paints a more complex picture examining the role and effect of digital activism in challenging state hegemony in authoritarian contexts The book notes that while communication technologies help mediate activism they are also simultaneously constrained by pre existing and emergent challenges tied to the social and political context and the inherent limitations of those technologies The book investigates the tactics used by digital activists the contextual factors and restrictive political environment they operate in including the role of pro government activists and ultimately the impact of digital activism given these constraints From the case of Zimbabwe the book builds out a broader theoretical analysis of the evolution of third world protest in the digital age examining the limitations of activists actions and the ideological deficit in online activism to ferment a virulent counter hegemony

Emerging Challenges, Solutions, and Best Practices for Digital Enterprise Transformation Sandhu, Kamaljeet, 2021-06-18 As organizations continue to move towards digital enterprise the need for digital transformation continues to grow especially due to the COVID 19 pandemic These impacts will last far into the future as newer digital technologies continue to be accepted used and developed These digital tools will forever change the face of business and management However on the road to digital enterprise transformation there are many successes difficulties challenges and failures Finding solutions for these issues through strategic thinking and identification of the core issues facing the enterprise is of primary concern This means modernizing management and strategies around the digital workforce and understanding digital business at various levels These key areas of digitalization and global challenges such as those during or derived from the pandemic are new and unique They require new knowledge gained from a deep understanding of complex issues that have been examined and the solutions being discovered *Emerging Challenges Solutions and Best Practices for Digital Enterprise Transformation* explores the key challenges being faced as businesses undergo digital transformation It provides both solutions and best practices for not only handling and solving these key issues but for becoming successful in digital enterprise This includes topics such as security and privacy in technologies data management information and communication technologies and digital marketing branding and commerce This book is ideal for managers business professionals government researchers students practitioners stakeholders academicians and anyone else looking to learn about new developments in digital enterprise transformation of business systems from a global perspective **ValueWeb** Chris Skinner, 2016-01-15 The Internet of Things is all about machines trading with machines your fridge orders groceries your car fuel your television entertainment and so on However machines cannot trade with machines if it s expensive and slow Would you really want your TV to order the next season of Games of Thrones if the payment took ten days and cost 25 or more Unfortunately with the way the bank system works today that is the problem we face today As a result we need an Internet of Value to work with the Internet of Things The Internet of Value or ValueWeb for short allows machines to trade with machines and people with people anywhere on this planet in real time and for free Using a combination of technologies from mobile devices to bitcoin and the

for anyone at the beginner to intermediate level that wants to learn about the core concepts related to Blockchain technology

How South Africa Works Jeffrey Herbst, Greg Mills, 2015-07-01 The overwhelming challenge that South Africa faces and has to date failed to address is unemployment which falls especially on African youths who were promised a better future after 1994. If the current unemployment challenge is not addressed it will be impossible to sustainably lift many millions of people out of poverty. *How South Africa Works* reviews the country's major economic achievements over the past two decades. Through numerous interviews with politicians, business leaders and analysts it examines the challenges and opportunities across key productive sectors including agriculture, manufacturing, services and mining, illustrative of the policy challenges that leaders face. It scrutinises the social grant and education systems to understand if South Africa has established mechanisms for people not only to escape destitution but be ready to be employed and identifies steps that some of South Africa's most notable entrepreneurs have taken to build world class enterprises. Recognising the essential challenge to cultivate more employers to employ people, *How South Africa Works* concludes by offering an agenda and active steps for greater competitiveness for government, business and labour.

Universal Food Security Glenn Denning, 2023-01-03 What would it take to achieve a genuinely food secure world, one without hunger or malnutrition where everyone gets to consume the right quantity and quality of food to live a healthy, active and productive life? Bringing about such a future requires transforming how our food is grown, managed and distributed. From production to consumption, food systems must be sustainable, halting environmental degradation and even repairing the damage we have previously done. This book provides an accessible guide to making healthy diets from sustainable food systems available to all. Glenn Denning bridges the divisive worlds of science, policy and practice. He synthesizes the most relevant literature and shares personal perspectives and insights gained over four decades working in more than fifty countries, coupled with the real world experience of hundreds of leading experts. *Universal Food Security* lays out key priorities: sustainable intensification, market infrastructure, postharvest stewardship, healthy diets and social protection, and presents how to achieve food systems transformation. Denning identifies the education and development of practitioner leaders as the critical trigger of change. *Universal Food Security* informs and inspires those leaders acting on their own and with others through institutions to achieve a food secure world. This book is an ideal handbook for students and practitioners looking to transform our food systems at all levels.

14 Year-wise CDS & CDS OTA General Knowledge Previous Year Solved Papers (2018 - 2024) Phase I & II with 3 Practice Sets 2nd Edition | Combined Defence Services PYQs Disha Experts, 2024-10-22 The 2nd Edition of book 14 Year wise CDS CDS OTA General Knowledge Solved Papers 2018-2024 consists of last 7 years' Papers from 2018. and Errorless Solutions The solution of each and every question is provided in detail step by step so as to provide 100% concept clarity to the students These Year wise Papers can also be attempted as Mock Tests

Handbook on the Geographies of Power Mat Coleman, John Agnew, 2018-07-27 The so called spatial turn in the social sciences means that many researchers have become much more interested in what can be called the spatialities of power or the ways in which power as a medium for achieving goals is related to where it takes place Most famous authors on the subject such as Machiavelli and Hobbes saw power as entirely equivalent to domination exercised by some over others Though this meaning is hardly redundant understandings of power have become more multidimensional and nuanced as a result of the spatial turn Much recent writing in human geography for example has rigorously extended use of the term power beyond its typical understanding as a resource that pools up in some hands and some places to a medium of agency that has different effects depending on how it is deployed across space and how actors cooperate or not to give it effect To address this objective the book is organized thematically into four sections that cover the main areas in which much of the contemporary work on geographies of power is concentrated bodies economy environment and energy and war

e-Infrastructure and e-Services Roch Glitho, Marco Zennaro, Fatna Belgasmi, Max Agueh, 2016-10-13 This book constitutes the thoroughly refereed proceedings of the 7th International Conference on e Infrastructure and e Services for Developing Countries AFRICOMM 2015 held in Cotonou Benin in December 2015 The 25 papers were carefully selected from 51 submissions and cover topics such as communication infrastructure access to information green IT applications and security health

Digital Human Chris Skinner, 2018-06-18 Digital is far reaching and ubiquitous everything you know is about to change We are living in the fourth age of humanity First we became human Then we became civilized The third age saw the creation of commerce Now we are becoming digital Technology has changed the way we communicate trade and transact with repercussions extending far beyond our personal spheres Digital Human is a visionary roadmap for the future a timely guide on how to navigate the world of finance as we create the next generation of humanity It explores the digital evolution s impact and offers clear insights on thriving in this new era Human and business relationships are evolving and existing businesses must undergo substantial transformative changes to compete with the smaller lighter and more agile companies that are able to quickly maneuver to match shifting consumer demands A lack of online presence has become unthinkable as consumer preferences continue to trend heavily toward online business and transactions is your company equipped to thrive in this new era While there is no definitive guide to this new reality this insightful resource provides the starting point and roadmap to digital success in the financial services arena covering aspects such as Digital is not merely a bolting on of technology to produce results faster and cheaper but a complete rethinking of common business practices and notions of efficiency and customer engagement Rethinking business starts with the customer new business models are constructed entirely around this single guiding principle A digital business model is all about connectivity with front office apps tied in to both back office analytics

and marketplaces with many players and segments Businesses must open their operations to this marketplace of players through APIs necessitating a conversion of many core systems Central business and technology systems must change to adapt to new market entrants and new technologies that range from AI for back office analytics to Distributed Ledger Technology DLT for global operations Leaders must rethink their businesses to be fit for the future digital age and this comprehensive resource shines a spotlight on the key elements to this transformation
