International Handbook of Urban Education William T. Pink,George W. Noblit,2008-09-03 It is evident that urban education has become

the central focus of educators at the present time In the U S for example almost one third of all school age children attend schools in large urban school districts It is in these urban schools where the diversity of cultures and languages is highest and where student learning is most problematic What has emerged from recent work to improve urban schools is the insight that there is no one size fits all panacea Rather we have discovered that the local context shapes in critically important ways what will be effective at the school level The universality of the problematics with urban education together with the importance of understanding the local or situated context of improvement interventions brings into sharp focus the importance and timeliness of an undertaking like the International Handbook of Urban Education An important focus of the International Handbook of Urban Education will be the interrogation of both the social and political factors that lead to different problem posing and subsequent solutions within each region An important question to be answered for example is what it takes in terms of resources political will and policy actions to improve urban education **Moto**,2001 Science Teachers Association of Nigeria Science Teachers Association of Nigeria. Annual Conference,2002* Teacher in Zimbabwe,2014 **Proceedings of the ... Annual Conference and ... Conference of CASTME Africa** Science Teachers Association of Nigeria. Conference,2002 Zimbabwe Journal of Educational Research ,2005 **Studies in Art Education** ,2003 *Parliamentary Debates* Zimbabwe. Parliament,2004 **Education and Development in Zimbabwe** Edward Shizha,Michael T. Kariwo,2012-01-01 The book represents a contribution to policy formulation and design in an increasingly knowledge economy in Zimbabwe It challenges scholars to think about the role of education its funding and the egalitarian approach to widening access to education The nexus between education democracy and policy change is a complex one The book provides an illuminating account of the constantly evolving notions of national identity language and citizenship from the Zimbabwean experience The book discusses educational successes and challenges by examining the ideological effects of social political and economic considerations on Zimbabwe s colonial and postcolonial education Currently literature on current educational challenges in Zimbabwe is lacking and there is very little published material on these ideological effects on educational development in Zimbabwe This book is likely to be one of the first on the impact of social political and economic meltdown on education The book is targeted at local and international academics and scholars of history of education and comparative education scholars of international education and development undergraduate and graduate students and professors who are interested in educational development in Africa particularly Zimbabwe Notwithstanding the book is a valuable resource to policy makers educational administrators and researchers and the wider community Shizha and Kariwo s book is an important and illuminating addition on the effects of social political and economic trajectories on education and development in Zimbabwe It critically analyses the crucial specifics of the Zimbabwean situation by providing an in depth discourse on education at this historical juncture The book offers new insights that may be useful for an understanding of not only the Zimbabwean case but also education in other African countries Rosemary Gordon Senior

Lecturer in Educational Foundations University of Zimbabwe Ranging in temporal scope from the colonial era and its elitist legacy through the golden era of populist universal elementary education to the disarray of contemporary socioeconomic crisis covering elementary through higher education and touching thematically on everything from the pernicious effects of social adjustment programmes through the local deprofessionalization of teaching this text provides a comprehensive wide ranging and yet carefully detailed account of education in Zimbabwe This engagingly written portrayal will prove illuminating not only to readers interested in Zimbabwe s education specifically but more widely to all who are interested in how the sociopolitical shapes education how ideology policy international pressures economic factors and shifts in values collectively forge the historical and contemporary character of a country s education Handel Kashope Wright Professor of Education University of British Columbia
