**The Final Empire** Wm. H. Kötke, 2007-11 In spite of its tough message there is much compassion and humanity in The Final Empire Right away as you begin to read this work you sense increasingly the grand perspective in Kötke's words He is not speaking of anarchy He is offering vital common sense It's just that his meaning is so unavoidably political And so much against what we have been taught all our lives The materialistic values of civilization teach us that the accumulation of wealth is progress The material wealth of the civilization is derived from the death of the earth the soils the forests the fish stocks the free resources of flora and fauna The ultimate end of this is for all human species to live in giant parasitical cities of cement and metal while surrounded by deserts of exhausted soils The simple polar opposites are the richness and wealth of the natural life of earth versus the material wealth of people living out their lives in artificial environments This amounts to a direct challenge to humankind A demand for radical change A re-envisioning of our part in the community of life and the precepts of individuality And Mr Kötke provides a strong argument for this case He traces the environmental scars of civilization through the ages Empire after empire desertification of the top soil winds its way around the globe in an erosive helix from China to India to Mesopotamia to Italy to North America As radical as it may seem at first glance The Final Empire is a necessary and sensible primer for the recovery of the planet It blends a critical statistical analysis of our deteriorating environment with a positivism of hope for a post empire age and a new whole human relation to the living community of Earth Dan Armstrong Author of the Novels *Prairie Fire* and *Taming the Dragon* Permaculture International Journal, 1999 *Earth Changes Handbook* Ken Ludden, 2011-11-23 This handbook is designed to support the Earth Changes Workshop first given in northern California on December 2-4 2011 Ken Ludden Loron Lavoie Nelise Carbonare Matita Makarta Orion Trist and Ashley Philpot have combined their collective knowledge base and put together this workshop that teaches skills that will be needed to prepare for survive and re-establish world civilization after the earth crust shift Dedicated to the survival of mankind this workshop prepares the individual to have the resourceful and flexible state of mind necessary to face the potential earth crust shift Not only is much of the science that supports the ECS theory presented in this workshop but the fundamental set of skills needed to survive in the wild are presented in an organized and illuminating fashion *Understanding the Global Experience* Thomas Arcaro, Rosemary Haskell, Chinedu Eke, Robert Anderson, Stephen Braye, Ann Cahill, Brian Digre, Anne Bolin, Mathew Gendle, Duane McClearn, Jeffrey Pugh, Laura Roselle, Jean Schwind, Kerstin Sorensen, Anthony Weston, 2016-03-22 First Published in 2016 In this anthology of essays for Global Studies students the editors hope to
