

RELAPSE PREVENTION PLANNING

Recognize the Steps of a Relapse

Step 1

The first step is emotional

Your subconscious mind is working, but you are not fully aware of it happening. It can still influence your actions and the decisions you make.

Step 2

The second step is mental

Mental relapse is the moment you begin to think about going back to that old life. You also start to remember all the good times you had during your addiction. You choose to forget the bad times that came with it.

Step 3

The third step is physical

Physical relapse is the part that no recovering addict wants to do. You have listened to that little voice in your head that tells you just one more time will be ok.

Don't listen to that voice that tells you one more is gonna be okay!

Samhsa Relapse Prevention Curriculum:

SAMHSA News ,2006 *Evidence-Based Practices for Children Exposed to Violence* Clare Anderson,2011-08 This report summarizes findings from federal reviews of research studies and program evaluations to help communities improve outcomes for children exposed to violence It cites evidence based practices that practitioners and policymakers can use to implement prevention services and activities for these children In each case programs and practices that are reviewed are supported by multiple research studies or program evaluations Charts and tables This is a print on demand edition of an important hard to find report *Addictions Counseling* Cynthia A. Faulkner,Samuel S. Faulkner,2019 Addictions Counseling employs the unique approach of following a client through the counseling process intake assessment individual group family counseling and discharge relapse prevention planning Along the way readers are introduced to theories techniques and hands on examples of what is required in the counseling process *Handbook of Behavioral and Cognitive Therapies with Older Adults* Dolores Gallagher Thompson,Ann Steffen,Larry W. Thompson,2007-10-12 It gives me great pleasure to witness continued growth in the application of cognitive and behavioral theories and therapies to more diverse populations including in this volume their application to the mental health problems of later life Evidence continues to accumulate demonstrating that these are effective in treating a broad range of elderly patient groups This is the first book to examine a number of these evidence based interventions currently in use with older adults The editors have assembled chapters developed in many of the leading clinical and clinical research programs focusing on elderly patients both in this country and in the UK Since the emphasis of this volume is primarily on clinical application each author group was asked to discuss the empirical data for the treatment strategies it is using with the specific patient group selected Typically this was followed by a detailed description of treatment procedures that were then illustrated by one or more clinical examples The book begins by examining the treatment of depressive and anxiety disorders and then moves on to more complicated and or serious disorders including schizophrenia and other psychoses suicidal behavior personality disorders bipolar disorders dementia and complicated bereavement A chapter on the problems and issues in training therapists to use evidence based interventions effectively is also included along with a chapter discussing the implications of Medicare policies and guidelines for service delivery
