Half-Life lab

Purpose

The purpose of this hands-on lab is to model the concept of half-life using a sample to represent radioactive atoms.

Materials

- 200 M&M's, candies, pennies, or other small candies/coins with two distinct sides
- shoe box or other small box and a lid

Procedure

1. Place 200 candies in the shoe box, lettered side up. The candies will stand for atoms of a hypothetical radioactive element.

2. Cover the box and shake it vigorously for three seconds. This is one time interval.

3. Remove the lid and take out any candies/coins that have that any now showing lettered side down. These candies represent the atoms that decayed during the time interval. Count and record in a data table the number of decayed atoms and the number of remaining (un-decayed) atoms.

4. Continue repeating steps two and three until all atoms have decayed or you have reached half-life seconds on the decay table.

5. Repeat the entire experiment (steps 1-4) a second time and record all data.

Data and Observations

Time (sec.)	Radioactive Atoms (Remaining) decayed	Atoms Decayed
0	200	0
3	100	100
6	125	175
9	88	112
12	44	156
15	25	175
18	13	187
21	7	193
24	4	196
27	2	198
30	1	199

Create and complete a data table like the one below for each trial.

Virtual Lab Half Life Answers

Andreas Hebbel-Seeger,Torsten Reiners,Dennis Schäffer

Virtual Lab Half Life Answers:

Exploring Physical Science in the Laboratory John T. Salinas ,2019-02-01 This full color manual is designed to satisfy the content needs of either a one or two semester introduction to physical science course populated by nonmajors It provides students with the opportunity to explore and make sense of the world around them to develop their skills and knowledge and to learn to think like scientists The material is written in an accessible way providing clearly written procedures a wide variety of exercises from which instructors can choose and real world examples that keep the content engaging Exploring Physical Science in the Laboratory guides students through the mysteries of the observable world and helps them develop a clear understanding of challenging concepts **HCI in Games** Xiaowen Fang,2025-06-02 This book constitutes the refereed proceedings of the 7th International Conference on HCI in Games held as part of the 27th International Conference HCI International 2025 which took place in Gothenburg Sweden during June 22 27 2025 The total of 1430 papers and 355 posters included in the HCII 2025 proceedings was carefully reviewed and selected from thousands of submissions The HCI Games 2025 proceedings was organized in the following topical sections Part 1 Gamification UX and Player Behavior Part 2 Identity Emotion and AI in Game Experiences Part 3 Gamified Learning and Design Part 4 Games in Healthcare and Wellbeing

Synthetic Worlds Andreas Hebbel-Seeger,Torsten Reiners,Dennis Schäffer,2013-08-13 Synthetic Worlds Virtual Worlds and Alternate Realities are all terms used to describe the phenomenon of computer based simulated environments in which users inhabit and interact via avatars The best known commercial applications are in the form of electronic gaming and particularly in massively multiplayer online role playing games like World of Warcraft or Second Life Less known but possibly more important is the rapid adoption of platforms in education and business where Serious Games are being used for training purposes and even Second Life is being used in many situations that formerly required travel The editors of this book captures the state of research in the field intended to reflect the rapidly growing yet relatively young market in education and business The general focus is set on the scientific community but integrates the practical applications for businesses with papers on information systems business models and economics In six parts international authors all experts in their field discuss the current state of the art of virtual worlds alternate realities and how the field will develop over the next years Chapters discuss the influences and impacts in and around virtual worlds Part four is about education with a focus on learning environments and experiences pedagogical models and the effects on the different roles in the educational sector The book looks at business models and how companies can participate in virtual worlds while receiving a return on investment and includes cases and scenarios of integration from design implementation to application _Social Media and Networking: Concepts, Methodologies, Tools, and Applications_ Management Association, Information Resources,2015-07-31 In the digital era users from around the world are constantly connected over a global network where they have the ability to connect share and collaborate like never before To make the most of this new environment researchers and software

developers must understand users needs and expectations Social Media and Networking Concepts Methodologies Tools and Applications explores the burgeoning global community made possible by Web 2 0 technologies and a universal interconnected society With four volumes of chapters related to digital media online engagement and virtual environments this multi volume reference is an essential source for software developers web designers researchers students and IT specialists interested in the growing field of digital media and engagement This four volume reference includes various chapters covering topics related to Web 2 0 e governance social media activism internet privacy digital and virtual communities e business customer relationship management and more *Maximum PC* ,2005-01 Maximum PC is the magazine that every computer fanatic PC gamer or content creator must read Each and every issue is packed with punishing product reviews insightful and innovative how to stories and the illuminating technical articles that enthusiasts crave
