

LESSON 4.1. RISK AND REQUIRED RATE OF RETURN

"Nothing ventured, nothing gained"

"If it seems too good to be true, then probably it is"

- ✓ Understanding the concept of risk and return (the relationship and impact on decision making)
- ✓ Assessing the measuring of risk of (a) single asset; (b) portfolio of assets
 - Quantify risk
- ✓ Measurement of return
- ✓ Diversification

RISK → as the measure of uncertainty.

→ Variability of returns associated with the given asset

RETURN → gain (loss) experienced on an investment over a given period

$$r_t = \frac{C_t + P_t - P_{t-1}}{P_{t-1}} \quad (8.1)$$

where

r_t = annual, reported, or required rate of return during period t

C_t = cash flow(s) received from the asset investment in the time period $t = 1$ to T

P_t = price (value) of asset at time t

P_{t-1} = price (value) of asset at time $t = 1$

The return, r_t , reflects the combined effect of cash flow, C_t , and changes in value, $P_t - P_{t-1}$, over the period.

Equation 8.1 is used to determine the rate of return over a time period as short as 1 day or as long as 10 years or more. However, in most cases, t is 1 year, and r therefore represents an annual rate of return.

Question: Why do investors prefer treasury bonds or bills as compared to shares/stocks?

RISK PREFERENCES → describes how investor responds to risk.

1. Risk averse- investors prefer less risky investments over more risky one.
2. Risk neutral- based solely on their expected returns, disregarding the risks
3. Risk- seeking- prefer investments with higher risk

RISK ASSESSMENT & MEASUREMENT

SINGLE ASSET

1. Scenario analysis → considering several possible outcomes and its return (Pessimistic/ worst, most likely/ expected, optimistic/ best)
*range of possible outcomes= optimistic- pessimistic

TABLE 8.2 Assets A and B

	Asset A	Asset B
Initial investment	\$10,000	\$10,000
Annual rate of return		
Pessimistic	13%	7%
Most likely	15%	15%
Optimistic	17%	23%
Range	4%	16%

Risk Vs Return Lesson 14 Answers

AW Rasmussen

Risk Vs Return Lesson 14 Answers:

Economics Of Banking, The (Fourth Edition) Kent Matthews, John Thompson, Tiantian Zhang, 2023-09-13 The Economics of Banking Fourth Edition examines trends and operations in banking within a microeconomic framework Covering a range of topics including global trends in banking theories of the banking firm economics analysis of bank behaviour and much more this book addresses the need for a user friendly and mathematically accessible textbook in this subject area Each successful edition has expanded on new and emerging developments in global banking This fourth edition explores the challenge of fintech and non bank financing to the banking market It examines the implications of the digitisation of the means of payment on the banking system and the emergence of the digital bank It also addresses recent developments in shadow banking both globally and with a specific focus on China P2P Islamic banks and challenger banks The section on credit rationing and credit pricing has been expanded to include additional material on the geography of credit allocation and spatial rationing China features strongly in the updated material on bank efficiency and competition Bank regulation has also been updated to examine the recent changes in global bank regulation and particularly the application of Basel III standards to China and other Asian economies The Economics of Banking provides a sound theoretical basis for understanding bank behaviour while requiring only a basic knowledge of microeconomics The book is aimed at final year undergraduates undertaking a Banking Finance degree and to MBA and specialised PG degrees in Finance that include a Banking option
