#### Multimedia Modeling, Modeling Multimedia Information And Systems - Proceedings Of The First International Workshop

Ahmed Karmouch, 1999-09-24 Multimedia systems result from the merging of the computing communications and broadcasting industries This merging has been made possible today by the technical advances in high speed broadband networks computer desktop workstations and information storage and compression techniques Currently text and image are the predominant forms of information exchanged over the Internet However there are clear signs that the situation is rapidly changing with the recent emergence of multimedia applications in the area of education business e commerce and entertainment resulting therefore in increased consumption of network bandwidth and in the creation of a very large volume of information that needs to be processed and stored This trend has made strong demands on the multimedia modeling research community to develop new semantic models that will further facilitate the creation representation manipulation and animation of multimedia content with a better level of granularity than what is possible to achieve with today s multimedia information systems This volume explores issues associated with multimedia modeling information and systems and presents the current status of work in this field It covers a broad range of theoretical conceptual and practical topics and addresses the needs of a wide audience including researchers multimedia systems designers and users of multimedia systems
