*Dph Sports Series-Softball* H.C. Dubey, 1999 In a world where there are some 820 million people unemployed or underemployed and where 86 million people are born every year it is not surprising that one out of every four individuals lives in absolute poverty. But Publishing this book seeks to get positive response as means by which sports can promote and propagate peace and international cooperation. Sportsmen form a large identifiable cadre. We visualises a situation where a conscious efforts is made all over the world to train the sportspersons to spread the message of peace and international cooperation. Instead of peace keeping efforts through arms and army the sportspersons may be used as soilders of peace in a subtle manner. The effort is to make the realize the contribution of sports as a factor for sustainable development peace keeping and international cooperation. This book will be useful to the sports promoters organisers coaches and other persons related or interested in sports.

**Making Sense of Word Problems** Eric de Corte, Brian Greer, Lieven Verschaffel, 2000-01-01 Word problems have been a staple of mathematics instruction for centuries yet the rationale for their use has remained largely unexamined. A range of findings have shown how students consistently answer them in ways that fail to take account of the reality of the situations described. This monograph reports on studies carried out to investigate this suspension of sense making in answering word problems. In Part One a wide range of examples documenting the strength of the phenomenon is reviewed. Initial surprise at the findings was replaced by a conviction that the explanation lies in the culture of the mathematics classroom specifically the rules implicitly governing the nature and interpretation of the word problem genre. This theoretical shift is reflected in Part Two. A detailed analysis of the way in which word problems are currently taught in typical mathematical classrooms is followed by reviews of design experiments illustrating how by immersing students in a fundamentally changed learning environment they can acquire what the authors consider to be more appropriate conceptions about and strategies for doing word problems. Part Three turns to a wider discussion of theoretical issues a further analysis of the features of the educational system considered responsible for outcomes detrimental to many students understanding and conception of mathematics and suggestions for rethinking the role of word problems within the curriculum.
