work on your PC to building 3 D goggles motion trackers 3 D sound systems biofeedback and more No programming or electronics experience required

Clinical Decision Making for the Physical Therapist Assistant Steven B.

Skinner,Christina McVey,2010-03-03 Clinical Decision Making for the Physical Therapist Assistant is a practical guide to developing the clinical judgment essential to effective patient care Co authored by two prominent physical therapy educators this informative reference addresses a skill that is crucial to the success of Physical Therapist Assistants PTAs Designed to integrate decision making into PTA education it covers the types of decisions that must be made in physical therapy treatment and offers sound guidance on how to make them Critical thinking questions and treatment activities are included with each chapter to enable students to apply what they ve learned to real life situations This text is a valuable resource for intermediate and post intermediate physical therapist assistant courses Designed Specifically for PTAsProvides clear guidance on making everyday clinical decisionsCovers decision making in the context of major areas of physical therapyIntegrates decision making into technical educationProvides examples of decisions encountered in patient care Intermediate and post intermediate Physical Therapist Assistant courses 2011 192 pages

Current State of Postural Research - Moving Beyond the Balance Platform Emily Keshner,Joyce Fung,Tanvi Bhatt,2024-02-05

The concept of posture control has morphed over the past century from a reflex hierarchically controlled innate behavior to a complex and adaptable motor act highly influenced by cognitive processes as well as confidence and attentiveness of the performer In addition multisensory control of posture has been recognized as a process of fusion and integration rather than summation and inhibition Advances in computational modeling and imaging have revealed that higher cortical centers are involved in production of what were previously believed to be stereotypical triggered reactions Emerging evidence now supports the idea that postural behaviors are regulated by distributed control in the neuraxis and shaped by dynamic interactions of sensorimotor processes in a task and context dependent manner
