

TREMEC TR-6060™ Transmission

6-Speed FWD Manual Transmission

The TREMEC TR-6060 six-speed manual transmission is found in high-performance racing vehicles. Along with the capability to stand up to some of the highest torque engines in the industry, the TR-6060 delivers great overall shift feel with short throws and smooth gear synchronization.

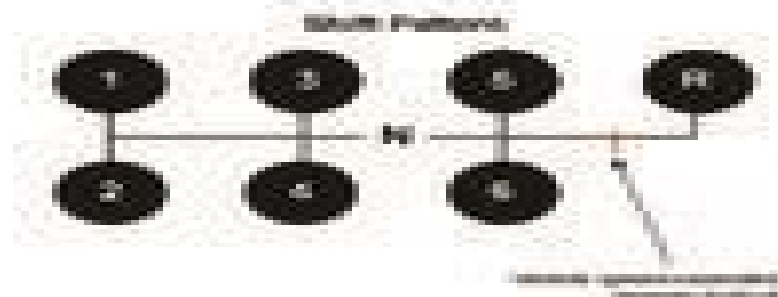

Design features of the TR-6060 include a combination of double-cone and triple-cone synchronizers on all gears. Anti-friction ball studs and fine-pitch splines provide reduced friction between components. A spring loaded anti-friction roller in combination with broached forward and reverse detent grooves on the mainshaft provide precise control of shift detents and a positive shift feel.

Benefits Tailored to Extreme Performance

Reduced torsion and aft shift lever and reverse synchronizer hubs allow greater force input on all gears. The gears utilize a two piece design with hardened clutch teeth for more precise gear engagement.

TR-6060 Features at a Glance:

- Rear wheel drive, six-speed manual overdrive transmission
- Close ratio gearing
- Three piece "end load design" aluminum housing
- Rigid supported output shaft and countershaft
- Taper bearings and cylindrical roller bearings
- 3.8:1 speed gears supported by needle bearings
- Integrated clutch housing improves case strength
- Two-piece gears with laser welded clutch teeth rings
- Advanced and asymmetric clutch teeth in second and third gears improve shifting action
- Multiple shifter locations for design/installation flexibility
- Hybrid anti-simmer torsion double and triple cone synchronizers offer lightning quick gear changes with full-throttle engagement
