

TREMEC TR-6060™ Transmission 6-Speed RWD Manual Transmission

The TREMEC TR-6060 six-speed manual transmission is found in high-performance flagship vehicles. Along with the capability to stand up to some of the highest-output V-8 engines in the industry, the TR-6060 delivers great overall shift feel with short throws, and smooth gear synchronization.

Design features of the TR-6060 include a combination of double-cone and triple-cone synchronizers on all gears. Anti-friction ball struts and fine-pitch splines provide reduced friction between components. A spring loaded anti-friction roller, in combination with broached forward and reverse detent grooves on the mainshaft provide precise control of shift detents and a positive shift feel.

Gearsets Tailored to Enhance Performance

Reduced fore and aft shift travel and narrow synchronizer hubs allows greater face width on all gears. The gears utilize a two piece design with machined clutch teeth for more precise gear engagement.
