The SAGES Manual for Navigating a Successful Military Surgical Career Andrew T. Schluskel, Danielle B. Holt, Robert B. Lim, Tamara J. Worlton, E. Matthew Ritter, 2025-07-02 The aim of this manual is to offer a comprehensive framework for both present and future military surgeons enabling them to effectively navigate and build a successful career within the military while also providing them with transferable skills upon completion of their military service. The military healthcare system operates within a unique framework with distinct challenges and opportunities. By acquiring knowledge and insights into the intricacies of military career paths, surgeons can make informed decisions about assignments, promotions, and professional development. Navigating an Army, Air Force, Navy, or Reserve career requires an understanding of the organizational structures, consultant roles, and specific requirements of each service branch. Additionally, being aware of opportunities for advanced education, leadership development, and operational assignments enables surgeons to develop a career trajectory aligned with their goals and aspirations. Presently, there is not a sole source document either in the military or civilian sectors that allows easy access and references to the multiple opportunities afforded to military surgeons or an understanding of life as a surgeon on active duty. Furthermore, this text provides context to civilian organizations, administrative personnel, recruiting departments, and family members that interact with or assist in making important decisions for military surgeons. This manual features insight and guidance from senior leaders of our Armed Forces, both past and present, who have excelled in academic, operational, and clinical surgical careers. By providing a reference for successfully navigating a military career, this will not only enhance the professional growth of a surgeon but also ensure the delivery of high-quality healthcare to our service members and beneficiaries, both domestic and abroad.
