Visual Dysfunction in Schizophrenia: A View into the Mechanisms of Madness? Randolph Blake, Steven Silverstein, Brian P. Keane, Michael Green, Szabolcs Kéri, 2015-05-11

Research on visual perception in schizophrenia has a long history However it is only recently that it has been included in mainstream efforts to understand the cognitive neuroscience of the disorder and to assist with biomarker and treatment development e g the NIMH CNTRICS and RDoC initiatives Advances in our understanding of visual disturbances in schizophrenia can tell us about both specific computational and neurobiological abnormalities and about the widespread computational and neurobiological abnormalities in the illness of which visual disturbances constitute well studied replicable low level examples Importantly far from being a passive sensory registration process visual perception is active inferential and hypothesis generating and therefore can provide excellent examples of breakdowns in general brain functions in schizophrenia Despite progress made in understanding visual processing disturbances in schizophrenia many challenges exist and many unexplored areas are in need of examination For example the directional relationships between perceptual and cognitive disturbances e g in attention memory executive function predictive coding remain unclear in many cases as do links with symptoms including visual hallucinations The effect of specific visual disturbances on multisensory integration in schizophrenia has also not been explored In addition few studies of vision in schizophrenia have used naturalistic stimuli including real world objects and almost no studies have examined processing during interaction with objects or visual exploration which can provide important data on functioning of the perception for action pathway Relatedly studies of visual processing in schizophrenia have also not been conducted within contexts that include emotional stimulation and the presence of reinforcers characteristics of many real world situations and the consequences of this are likely to be an incomplete view of how and when perception is abnormal in the condition An additional important area involves treatment of visual disturbances in schizophrenia Two major questions regarding this are 1 can visual processing be improved in cases where it is impaired and by what types of interventions affecting which cognitive and neurobiological mechanisms and 2 what are the clinical and functional benefits of improving specific visual functions in people with schizophrenia Other important and understudied questions concern 1 the extent to which indices of

visual functioning can serve as biomarkers such as predictors of relapse treatment response and or recovery 2 the potential role of visual functioning in diagnosing and predicting illness 3 the extent to which some visual perception disturbances are diagnostically specific to schizophrenia and 4 the extent to which visual disturbances are truly manifestations of disease as opposed to aspects of normal variation that in combination with disease serves to modify the clinical presentation This Frontiers Research Topic explores some of these and other issues facing this exciting interface between vision science and schizophrenia research We include papers that span the entire range of different Frontiers paper types including those that are data driven using psychophysics electroencephalography neuroimaging computational and animal models and other methods reviews hypotheses theories opinion methods areas of impact and historical perspectives [Membership Roster](#) [and International Buyers' Guide to Marketing Services](#) American Marketing Association,1983 **Immigration Detention, Risk and Human Rights** Maria João Guia,Robert Koulis,Valsamis Mitsilegas,2016-02-24 This book offers a brand new point of view on immigration detention pursuing a multidisciplinary approach and presenting new reflections by internationally respected experts from academic and institutional backgrounds It offers an in depth perspective on the immigration framework together with the evolution of European and international political decisions on the management of immigration Readers will be introduced to new international decisions on the protection of human rights together with international measures concerning the detention of immigrants In recent years International Law and European Law have converged to develop measures for combatting irregular immigration Some of them include the criminalization of illegally entering a member state or illegally remaining there after legally entering Though migration has become a great challenge for policymakers legislators and society as a whole we must never forget that migrants should enjoy the same human rights and legal protection as everyone else [Unique 3-in-1 Research & Development Directory](#) ,1989 **The Internet Health, Fitness & Medicine Yellow Pages** Matthew Naythons,Anthony Catsimatides,1995 Directory of Internet addresses for medical and health related topics on the Internet Includes URLs for some hospitals and medical schools [Physics Briefs](#) ,1994 *Who's who in the West* ,1954 *New Serial Titles* ,1969 *Middlebury Magazine* ,2003 **Who's who of Emerging Leaders in America** ,1991
