The Poisoning Of An American High School:

The Poisoning of an American High School Joy Horowitz, 2008 If it can happen in Beverly Hills it can happen anywhere The Poisoning of an American High School is a feat of investigative reportage and the product of four years of research by award winning journalist Joy Horowitz Making lucid the tangled issues of public health regulation and the political power of industry it tells a riveting tale ripped from newspaper headlines a cancer cluster affecting graduates of one of America's most affluent schools Beverly Hills High The Poisoning of an American High School presents the behind the scenes saga of the 2003 landmark toxic tort suit in which more than one thousand plaintiffs with the sensational Erin Brockovich as their champion claimed their illnesses could be traced to exposure to the oil derricks just yards from school grounds The Poisoning of an American High School Joy Horowitz, 2008 Toxic and Intoxicating Oil Patricia Widener, 2021-03-12 When oil and gas exploration was expanding across Aotearoa New Zealanders faced the typically distinct problems of oil spills hydraulic fracturing offshore exploration climate fears and disputes over unresolved Indigenous claims nearly simultaneously Collectively these grievances created the foundation for an organized civil society to construct and then magnify a comprehensive critical oil narrative in dialogue practice and aspiration Community advocates and socioecological activists mobilized for their health and well being for their neighborhoods and beaches for Planet Earth and Planet Ocean and for terrestrial and aquatic species and ecosystems In this allied ethnography quotes are used extensively to convey the tenor of some of the country's most passionate and committed people By analyzing the intersections of a social movement and the political economy of oil Patricia Widener reveals a nuanced story of oil resistance and promotion at a time when many anti drilling activists believed themselves to be on the front lines of the industry's inevitable decline *Fractured Communities* Anthony E. Ladd, 2018-03-23 While environmental disputes and conflicts over fossil fuel extraction have grown in recent years few issues have been as contentious in the twenty first century as those surrounding the impacts of unconventional natural gas and oil development using hydraulic drilling and fracturing techniques more commonly known as fracking on local communities In *Fractured Communities* Anthony E Ladd and other leading environmental sociologists present a set of crucial case studies analyzing the differential risk perceptions socio environmental impacts and mobilization of citizen protest or quiescence surrounding unconventional energy development and hydraulic fracking in a number of key U S shale regions *Fractured Communities* reveals how this contested terrain is expanding pushing the issue of fracking into the mainstream of the American political arena The American Cyclopaedia Ripley, 1876 **The American Cyclopaedia**, 1876 **Pathways Through Adolescence** Lisa J. Crockett, Ann C. Crouter, 2014-03-05 Adolescent researchers are increasingly aware that they must examine development both across time and across context To do so however requires new conceptualizations and methodological approaches to the study of development including attention to the pathways young people choose in adolescence and follow into adulthood This volume assembles work by key researchers in the field who are

struggling to understand how developmental trajectories are constructed and maintained throughout the adolescent period A complete understanding of developmental pathways requires the recognition that adolescents social contexts family school neighborhood and or peer group are important influences on the choices they make at this developmental period Researchers have traditionally studied contexts in isolation rather than examining the interrelationships among contexts and their implications for adolescent development The present volume seeks to address this gap in the literature with attention given not only to the interrelationships among contexts for white middle class youth but also to these issues for minority adolescents in neighborhoods that vary in terms of access to resources It concludes with an examination of researcher community collaboration as a strategy to move communities toward a greater awareness of adolescent development and the problems facing youth in their community and as a means to promote potential avenues for policy change and intervention
