at which the Alliance's leaders made bold decisions to adapt to a more unpredictable world and to ensure that its one billion people will be safe for the next decade and beyond. In his view the Transatlantic Alliance will remain capable of coping with today's challenges and future proof against ones yet to come through an ambitious and forward looking agenda. When President Biden visited Brussels in June he declared America is back. According to Jamie Shea a former Deputy Assistant Secretary General for Emerging Security Challenges at NATO this also means that NATO is back as Biden reaffirmed the U.S. solemn commitment to the defense of its European allies and Washington's willingness to once again lead a transatlantic alliance that was heavily criticized during the Trump years. He writes that at first sight this is all good news for NATO but could it turn out to be a mixed blessing for the Europeans in the longer run. He analyzes whether the NATO 2030 initiative is up to the task and if it provides the right answers. Due to NATO's reliance on space assets for operational effectiveness and the increased vulnerabilities of those assets the militarization of outer space presents a range of policy and legal challenges. Having to rely on space based assets and services to conduct military operations has proven to be NATO's Achilles heel as rivals work on counter space techniques. Aurel Sari Associate Professor of International Law at University of Exeter and Hitoshi Nasu Professor of International Law at University of Exeter ask given the vulnerability of space based assets and services to hostile interference under what circumstances the collective defense commitment as set out in Article 5 of the North Atlantic Treaty NAT arises in space.

Set in contemporary times Jimmy Malone dons a black hood and cape sending fear into the hearts of evildoers as he battles the underworld in the tradition of a modern day Shadow or Spider.
