**The Psychotherapy Relationship** Sherry Hatcher,Michelle Abel Horowitz,Robert Hatcher,Shanna Jackson,Christine Mok-Lammé,Chaya Rubin,Arielle Schwartz,C. Shields,Jessie Lopez,2014-11-29 This second volume in the Monograph Series of Fielding Graduate University features six articles on the cultural ramifications of the psychotherapy relationship based on recent dissertations by Fielding graduates Edited by Sherry L Hatcher Faculty Chair in the Clinical Psychology Program at Fielding Graduate University the monograph offers six in depth studies on some of the unique socio cultural aspects of the therapy relationship Jessie Whitehorse Lopez s article co authored by Robert Hatcher tells us about Native American psychotherapy clients how they evaluate standard measures of alliance and which criteria they propose to add in order to foster trust in the therapy relationship Interestingly Dr Lopez did not initially gain cooperation from Native American research participants until he happened to show them that he knew how to make tobacco pouches something his grandfather had taught him That anecdote recounted in the paper also speaks to the analogous importance of an effective research relationship Christine Mok Lamme s article serves to remind us to avoid stereotyping The article illustrates common expectations about what Chinese American psychotherapy clients want from their therapy in terms of either cognitive or emotion based interventions Dr Mok Lamme urges us to look at individual differences within cultures so as to formulate an appropriate psychotherapy treatment for each patient Arielle Schwartz takes us into new age culture by asking what psychologists think about embedding mind body methods in their work such as the use of relaxation techniques mindfulness practices and more She discovered interesting discrepancies between the mind body techniques that psychologists value personally and those that they are disinclined to incorporate into their professional work Shanna Jackson studied parallel cultures of abuse and what happens when therapists who have themselves suffered abuse and trauma treat clients with a similar history The potential for vicarious traumatization suggests that methods that typically promote therapist empathy may instead have the potential to unwittingly retraumatize some therapists Chaya Rubin and Comfort Shields explore the culture of therapists judgments based on archival data from a study published by the editor of this issue They investigate the question of whether the perceived culpability or vulnerability of a psychotherapy client may affect a therapist s ability to empathize with that client Michelle Horowitz introduces the reader to an exponentially expanding culture of social media and in particular how the delivery of electronically mediated psychotherapy may positively and or negatively impact the therapeutic relationship She further addresses ethical issues including the need for maximizing therapist competency in arranging for confidential delivery of therapy services via technologies such as Skype [Resources in Education](#) ,1983

Drorit Gaines, Henry V. Soper, 2019-11-25 When individuals from other cultures have psychological difficulties it is obvious that any therapy should be done with that cultural background in mind First and foremost this client will need to return to that culture and have to function successfully within it This means that the therapist should try to see the world through the eyes of this person's culture and understand what makes sense to him or her In practice however this is easier said than done As Arthur MacNeill Horton writes in the foreword to this book Definitions of culture are like toothbrushes everyone has one but no one wishes to use another's This volume tries to address this quandary by approaching the hidden cultures in psychotherapy from several different directions The first section of this book looks at the most prominent phenomena that the therapist is likely to encounter including gender based bias transgender bias or racial prejudice Other chapters look at cultures where sensitivity is less obvious such as those who are aging have disabilities or belong to a specific religious group such as the many strands within Judaism The second section of this book goes deeper by grappling with specific case studies and first person accounts Here we meet witnesses who as ethnic Japanese suffered from internment during the Second World War people who experienced prejudice and misunderstanding as members of First Nations Peoples and Hispanics who struggle with acculturation in the United States Each of these chapters serves as an example of what one person views as his or her culture and how this relates to effective therapy The essential message of the book is that while every client is unique the therapist should try to develop a sensitivity to these unique cultural indicators that may play a crucial role in the healing process      **Culture and Reflexivity in Systemic Psychotherapy** Inga-Britt Krause, 2018-03-21 The therapeutic relationship is increasingly becoming a central topic in systemic psychotherapy and cross cultural thinking Here experienced systemic psychotherapists offer their reflections and thoughts on the issues of race culture and ethnicity in the therapeutic relationship The aim is to develop this area of systemic practice to place culture squarely at the centre of all systemic psychotherapy practice as a model for all psychotherapy practice to encourage both trainees and experienced systemic psychotherapists to pay attention to race culture and ethnicity as central issues in their own and their clients identities and to inform researchers who use qualitative research techniques such as ethnography This book moves the issues of culture race and equity into the centre of psychotherapeutic practice including that which involves

therapeutic encounters across culture racial and ethnic divides It develops an approach to cultural transference and demonstrates that thinking about culture race and ethnicity does not belong at the margin      **Psychotherapy and Culture** Zack Eleftheriadou,2018-05-08 this book focuses on cross cultural relationships and examines how culture and racial factors manifest in the clinical setting It discusses on how to work with both cross cultural differentiation and integration
