The Reconstruction Of Space And Time Mobile Communication Practices:

The Reconstruction of Space and Time Rich Ling, Scott W. Campbell, 2010 One of the most significant and obvious examples of how mobile communication influences our understanding of time and space is how we coordinate with one another Mobile communication enables us to call specific individuals not general places Regardless of location we are able to make contact with almost anyone almost anywhere This advancement has changed and continues to change human interaction Now instead of agreeing on a particular time well beforehand we can iteratively work out the most convenient time and place to meet at the last possible moment on the way to the meeting or once we arrive at the destination In their early days mobile devices were primarily used for various types of emergency situations and for work In some cases the device was an essential element in various business operations or used so that overseas workers could communicate with their families The distance between a remote posting and the people back home was suddenly and dramatically reduced People began to share these devices not necessarily out of economic issues but also questions of family and interpersonal dynamics This cutting edge book deals with modern ways of thinking about communication and human interaction it will illuminate the ways in which mobile communication alters our experience with space and time Rich Ling is a sociologist at Telenor's research institute near Oslo Norway and has been Pohns Visiting Professor of Communication at the University of Michigan Ann Arbor He is the author of *New Tech New Ties How Mobile Communication is Reshaping Social Cohesion* and *The Mobile Connection The Cell Phone's Impact on Society* Scott W Campbell is assistant professor and Pohns Fellow of Telecommunications in the Department of Communication Studies at the University of Michigan His research has been published in the journals *Communication Education* *Communication Monographs* *International Journal of Communication* *Journal of Applied Communication Research* *New Media Society* and others

The Reconstruction of Space and Time Rich Ling, 2017 One of the most significant and obvious examples of how mobile communication influences our understanding of time and space is how we coordinate with one another Mobile communication enables us to call specific individuals not general places Regardless of location we are able to make contact with almost anyone almost anywhere This advancement has changed and continues to change human interaction Now instead of agreeing on a particular time well beforehand we can iteratively work out the most convenient time and place to meet at the last possible moment on the way to the meeting or once we arrive at the destination In their early days mobile devices were primarily used for various types of emergency situations and for work In some cases the device was an essential element in various business operations or used so that overseas workers could communicate with their families The distance between a remote posting and the people back home was suddenly and dramatically reduced People began to share these devices not necessarily out of economic issues but also questions of family and interpersonal dynamics The process of sharing decisions as to who is a legitimate partner makes the nature of relationships more explicit By examining the economy of sharing we not only see how sharing mobile phones

restructures social space but are also given insight into an individual's web of interactions. This cutting edge book deals with modern ways of thinking about communication and human interaction; it will illuminate the ways in which mobile communication alters our experience with space and time. Mobile Communication Rich Ling, Scott W. Campbell, 2011-12-31. Mobile Communication covers a wide range of topics. These include the replacement of co-present interaction with mediated contact and analysis of mobile-based cohesion and gender. The authors also explore the role of media choice and its effect on the quality as well as quantity of social cohesion. Other topics include mobile communication and communities of interest and mobile communication cohesion and youth. This volume brings together scholars from around the world to consider how mobile communication both builds and destroys our sense of social cohesion. There is no question that uses of technology can lead to increased cohesion within personal communities. For example, this volume includes research on caravan couples in Australia, factory workers in China, young couples in Germany, citizens in Slovenia, and sports clubs in Ireland. It also includes research on drunken calls between university students in the US, calls of international students in Switzerland, and communications between immigrant women in Melbourne, Australia. However, the contributors also argue that as social networks become inundated with mobile communication users, these users may become increasingly isolated and social division can ensue.

Mobile Communications Nicola Green, Leslie Haddon, 2009-12-15. The cellphone has achieved a global presence faster than any other form of information and communication technology. A global multi-billion dollar industry, this small, mundane device is now an intrinsic part of our everyday life. This communications medium has had an immense social and cultural impact and continues to evolve. Talking, texting, photographing, videoing, connecting to a network of other media: the cellphone now seems essential. But beyond the ways in which it has actively restructured our daily lives, the cellphone has changed our sense of ourselves and the way we see the world. The relationship between public and private space, how we view time and space, how we rely on and negotiate social networks: all are increasingly centred on this small piece of technology. Mobile Communications presents a succinct, challenging, and accessible overview of the transformations and challenges presented by this most personal yet most overlooked technology.

A Village Goes Mobile Sirpa Tenhunen, 2018. In *A Village Goes Mobile*, Sirpa Tenhunen examines how the mobile telephone has contributed to social change in rural India. Tenhunen's long-term ethnographic fieldwork in West Bengal began before the village had a phone system in place and continued through the introduction and proliferation of the smartphone. She here analyzes how mobile telephones emerged as multidimensional objects which, in addition to enabling telephone conversations, facilitated status aspirations, internet access, and entertainment practices. She explores how this multifaceted use of mobile phones has affected agency and power dynamics in economic, political, and social relationships, and how these new social constellations relate to culture and development. In eight chapters, Tenhunen asks such questions as: Who benefits from mobile telephony and how? Can people use mobile phones to change their lives, or does phone use

merely amplify existing social patterns and power relationships Can mobile telephony induce development Going beyond the case of West Bengal Tenhunen develops a framework to understand how new media mediates social processes within interrelated social spheres and local hierarchies by relating media saturated forms of interaction to pre existing contexts

The Routledge Research Companion to Media Geography Paul C. Adams, Jim Craine, 2016-03-23 This Companion provides an authoritative source for scholars and students of the nascent field of media geography While it has deep roots in the wider discipline the consolidation of media geography has started only in the past decade with the creation of media geography's first dedicated journal *Aether* as well as the publication of the sub discipline's first textbook However at present there is no other work which provides a comprehensive overview and grounding By indicating the sub discipline's evolution and hinting at its future this volume not only serves to encapsulate what geographers have learned about media but also will help to set the agenda for expanding this type of interdisciplinary exploration The contributors leading scholars in this field including Stuart Aitken Deborah Dixon Derek McCormack Barney Warf and Matthew Zook not only review the existing literature within the remit of their chapters but also articulate arguments about where the future might take media geography scholarship The volume is not simply a collection of individual offerings but has afforded an opportunity to exchange ideas about media geography with contributors making connections between chapters and developing common themes *Trains, Culture, and Mobility* Benjamin Fraser, Steven D. Spalding, 2012-01-01 *Trains Culture and Mobility* Riding the Rails goes beyond textual representations of rail travel to engage an impressive range of political sociological and urban theory Taken together these essays highlight the complexity of the modern experience of train mobility and its salient relation to a number of cultural discourses Incorporating traditionally marginal areas of cultural production such as graffiti museums architecture or even plunging into the social experience of travel inside the traincar itself each essay constitutes an attempt to work from the act of riding the train toward questions of much larger significance Crisscrossing cultures from the New World and Old from East and West these essays share a common preoccupation with the way in which trains and railway networks have mapped and re mapped the contours of both cities and states in the modern period Bringing together individual and large scale social practices this volume traces out the cultural implications of *Riding the Rails* *Technomobility in China* Cara Wallis, 2015-03-06 Winner of the 2014 Bonnie Ritter Book Award Winner of the 2013 James W Carey Media Research Award As unprecedented waves of young rural women journey to cities in China not only to work but also to see the world and gain some autonomy they regularly face significant institutional obstacles as well as deep seated anti rural prejudices Based on immersive fieldwork Cara Wallis provides an intimate portrait of the social cultural and economic implications of mobile communication for a group of young women engaged in unskilled service work in Beijing where they live and work for indefinite periods of time While simultaneously situating her work within the fields of feminist studies technology studies and communication theory Wallis explores the way in which the cell phone has been integrated into the transforming social

structures and practices of contemporary China and the ways in which mobile technology enables rural young women a population that has been traditionally marginalized and deemed as backward and other to participate in and create culture allowing them to perform a modern rural urban identity In this theoretically rich and empirically grounded analysis Wallis provides original insight into the co construction of technology and subjectivity as well as the multiple forces that shape contemporary China

Handbook on Geographies of Technology Barney Warf,2017-02-24 This Handbook offers an insightful and comprehensive overview from a geographic perspective of the numerous and varied technologies that are shaping the contemporary world It shows how geography and technology are intimately linked by examining the origins growth and impacts of 27 different technologies and highlighting how they influence the structure and spatiality of society

Locally Played Benjamin Stokes,2020-04-07 How games can make a real world difference in communities when city leaders tap into the power of play for local impact In 2016 city officials were surprised when Pok mon GO brought millions of players out into the public space blending digital participation with the physical Yet for local control and empowerment a new framework is needed to guide the power of mixed reality and pervasive play In Locally Played Benjamin Stokes describes the rise of games that can connect strangers across zip codes support the buy local economy and build cohesion in the fight for equity With a mix of high and low tech games Stokes shows cities can tap into the power of play for the good of the group including healthier neighborhoods and stronger communities Stokes shows how impact is greatest when games fit to the local community not just in terms of culture but at the level of group identity and network structure By pairing design principles with a range of empirical methods Stokes investigates the impact of several games including Macon Money where an alternative currency encouraged people to cross lines of socioeconomic segregation in Macon Georgia Reality Ends Here where teams in Los Angeles competed to tell multimedia stories around local mythology and Pok mon GO appropriated by several cities to serve local needs through local libraries and open street festivals Locally Played provides game designers with a model to strengthen existing networks tied to place and gives city leaders tools to look past technology trends in order to make a difference in the real world

Social Media in South India Shriram Venkatraman,2017-06-09 One of the first ethnographic studies to explore use of social media in the everyday lives of people in Tamil Nadu Social Media in South India provides an understanding of this subject in a region experiencing rapid transformation The influx of IT companies over the past decade into what was once a space dominated by agriculture has resulted in a complex juxtaposition between an evolving knowledge economy and the traditions of rural life While certain class tensions have emerged in response to this juxtaposition a study of social media in the region suggests that similarities have also transpired observed most clearly in the blurring of boundaries between work and life for both the old residents and the new Venkatraman explores the impact of social media at home work and school and analyses the influence of class caste age and gender on how and which social media platforms are used in different contexts These factors he argues have a significant effect on social media use

suggesting that social media in South India while seeming to induce societal change actually remains bound by local traditions and practices

The Tuning of Place Richard Coyne, 2010-03-26 How pervasive digital devices smartphones iPods GPS navigation systems and their networks us formulate a sense of place and refine social relationships How do pervasive digital devices smartphones iPods GPS navigation systems and cameras among others influence the way we use spaces In *The Tuning of Place* Richard Coyne argues that these ubiquitous devices and the networks that support them become the means of making incremental adjustments within spaces of tuning place Pervasive media help us formulate a sense of place writes Coyne through their capacity to introduce small changes in the same way that tuning a musical instrument invokes the subtle process of recalibration Places are inhabited spaces populated by people their concerns memories stories conversations encounters and artifacts The tuning of place whereby people use their devices in their interactions with one another is also a tuning of social relations The range of ubiquity is vast from the familiar phones and hand held devices through RFID tags smart badges dynamic signage microprocessors in cars and kitchen appliances wearable computing and prosthetics to

devices still in development Rather than catalog achievements and predictions Coyne offers a theoretical framework for discussing pervasive media that can inform developers designers and users as they contemplate interventions into the environment Processes of tuning can lead to consideration of themes highly relevant to pervasive computing intervention calibration wedges habits rhythm tags taps tactics thresholds aggregation noise and interference **Encyclopedia of Mobile Phone Behavior** Yan, Zheng,2015-03-31 The rise of mobile phones has brought about a new era of technological attachment as an increasing number of people rely on their personal mobile devices to conduct their daily activities Due to the ubiquitous nature of mobile phones the impact of these devices on human behavior interaction and cognition has become a widely studied topic The Encyclopedia of Mobile Phone Behavior is an authoritative source for scholarly research on the use of mobile phones and how these devices are revolutionizing the way individuals learn work and interact with one another Featuring exhaustive coverage on a variety of topics relating to mobile phone use behavior and the impact of mobile devices on society and human interaction this multi volume encyclopedia is an essential reference source for students researchers IT specialists and professionals seeking current research on the use and impact of mobile technologies on contemporary culture

HCI International 2022 - Late Breaking Posters Constantine Stephanidis,Margherita Antona,Stavroula Ntoa,Gavriel Salvendy,2022-11-23 Volume CCIS 1655 is part of the refereed proceedings of the 24th International Conference on Human Computer Interaction HCII 2022 which was held virtually during June 26 to July 1 2022 A total of 5583 individuals from academia research institutes industry and governmental agencies from 88 countries submitted contributions and 1276 papers and 275 posters were included in the proceedings that were published just before the start of the conference Additionally 296 papers and 181 posters are included in the volumes of the proceedings published after the conference as Late Breaking Work papers and posters The contributions thoroughly cover the entire field of human computer interaction addressing major advances in knowledge and effective use of computers in a variety of application areas The Oxford Handbook of Mobile Music Studies, Volume 2 Sumanth Gopinath,Jason Stanyek,2014-03 The two volumes of The Oxford Handbook of Mobile Music Studies consolidate an area of scholarly inquiry that addresses how mechanical electrical and digital technologies and their corresponding economies of scale have rendered music and sound increasingly mobile portable fungible and ubiquitous At once a marketing term a common mode of everyday life performance and an instigator of experimental aesthetics mobile music opens up a space for studying the momentous transformations in the production distribution consumption and experience of music and sound that took place between the late nineteenth and the early twenty first centuries Taken together the two volumes cover a large swath of the world the US the UK Japan Brazil Germany Turkey Mexico France China Jamaica Iraq the Philippines India Sweden and a similarly broad array of the musical and nonmusical sounds suffusing the soundscapes of mobility Volume 2 investigates the ramifications of mobile music technologies on musical sonic performance and aesthetics Two core arguments are that mobility is not the same thing as

actual movement and that artistic production cannot be absolutely sundered from the performances of quotidian life The volume's chapters investigate the mobilization of frequency range by sirens and miniature speakers sound vehicles such as boom cars ice cream trucks and trains the gestural choreographies of soundwalk pieces and mundane interactions with digital media dance music practices in laptop and iPod DJing the imagery of iPod commercials production practices in Turkish political music and black popular music the aesthetics of handheld video games and chiptune music and the mobile device as a new musical instrument and resource for musical ensembles

Global Geographies of the Internet Barney Warf, 2012-08-01 Today roughly 2 billion people use the internet and its applications have flourished in number and importance This volume will examine the growth and geography of the internet from a political economy perspective Its central motivation is to illustrate that cyberspace does not exist in some aspatial void but is deeply rooted in national and local political and cultural contexts Toward that end it will invoke a few major theorists of cyberspace but apply their perspectives in terms that are accessible to readers with no familiarity with them Beyond summaries of the infrastructure that makes the internet possible and global distributions of users it delves into issues such as the digital divide to emphasize the inequalities that accompany the growth of cyberspace It also addresses internet censorship e commerce and e government issues that have received remarkably little scholarly attention particularly from a spatial perspective Throughout it demonstrates that in cyberspace place matters so that no comprehensive understanding of the internet can be achieved without considering how it is embedded within and in turn changes local institutional and political contexts Thus the book rebuts simplistic death of distance views or those that assert there is or can be a one size fits all cookie cutter model of the internet applicable to all times and places

Sociality Revisited? The Use of the Internet and Mobile Phones in Urban Cameroon Bettina Anja Frei, 2013 This book draws on the perspectives of non migrants and urban youth in Bamenda in the Northwest region of Cameroon as well as on the views of Cameroonian migrants in Switzerland to explore the meaning and role of New Media in the negotiation of sociality in transnational migration New Media facilitated connectedness serve as a privileged lens through which Cameroonians home and away scrutinise and mediate sociality In this rich ethnography Bettina Frei describes how the internet and mobile phones are adopted by migrants and their non migrant counterparts in order to maintain transnational relationships and how the specific medialities of these communication technologies in turn impact on transnational sociality Contrary to popular presumptions that New Media are experienced as mainly connecting and enabling this study reveals that in a transnational context in particular New Media serve to mediate tensions in transnational social ties The expectations of being connected go hand in hand with an awareness of social and geographical distance and separation
