*The Philosophy of Perception* Lambert Wiesing, 2014      *The Philosophy of Perception* Lambert Wiesing, 2014-08-28  
Lambert Wiesing's *The Philosophy of Perception* challenges current theories of perception. Instead of attempting to understand how a subject perceives the world, Wiesing starts by taking perception to be real. He then asks what this reality means for a subject. In his original approach, the question of how human perception is possible is displaced by questions about what perception obliges us to be and do. He argues that perception requires us to be embodied, to be visible, and to continually participate in the public and physical world we perceive. Only in looking at images, he proposes, can we achieve something like a break in participation, a temporary respite from this one of perception's relentless demands. Wiesing's methods chart a markedly new path in contemporary perception theory. In addition to identifying common ground among diverse philosophical positions, he identifies how his own phenomenological approach differs from those of many other philosophers past and present. As part of the argument, he provides a succinct but comprehensive survey of the philosophy of images. His original critical exposition presents scholars of phenomenology, perception, and aesthetics with a new important understanding of the old phenomenon: the human being in the world.

***The Palgrave Handbook of Image Studies***  
Krešimir Purgar, 2021-10-01 This handbook brings together the most current and hotly debated topics in studies about images today. In the first part, the book gives readers an historical overview and basic diachronical explanation of the term image, including the ways it has been used in different periods throughout history. In the second part, the fundamental concepts that have to be mastered should one wish to enter into the emerging field of Image Studies are explained. In the third part, readers will find analysis of the most common subjects and topics pertaining to images. In the fourth part, the book explains how existing disciplines relate to Image Studies and how this new scholarly field may be constructed using both old and new approaches and insights. The fifth chapter is dedicated to contemporary thinkers and is the first time that theses of the most prominent scholars of Image Studies are critically analyzed and presented in one place.

***Philosophy of Dance***  
Peter A. French, Howard K. Wettstein, Patrick Londen, 2020-01-21 This volume brings together new work in the philosophy of dance for a general philosophical audience. Scholars working across the fields of philosophy, dance studies, and related areas explore the nature of dance as a practice and an artform. This collection of essays covers topics such as the experience of dancing, the nature and appreciation of dance artworks, and the distinctive contribution of dance to philosophical understanding.

***Images, Reality, and Digital Culture***  
Krešimir Purgar, 2025-09-30 Focusing on the moment of transition from the pictorial to the post-pictorial condition, this book advocates the opinion that what fundamentally distinguishes pictorial representation in Western civilization is one's ability to distinguish what the picture shows from what the picture refers to, and to that extent, the reality inside the picture cannot be confused with what is outside it. The contributions in this book serve as a kind of a missing link connecting the genealogy of traditional images with contemporary environmental

visualizations in the world that in this very moment undergoes a transition into a new exciting age in which many old knowledges are rapidly becoming obsolete and new ones are seeking their legitimacy Instead of leading the reader to reconciliation with the fatal diagnosis of the world under the rule of technological determinism this book indicates the key points of transition between the pictorial representation that traditionally belonged to the history of art and the virtual presence that is approached in quite different ways today This book will be of interest to scholars working in art history image philosophy image studies and digital studies     Self and Affect Stefan Lang, Maik Niemeck, 2025-01-11 The self self awareness and emotions are central subjects within contemporary philosophy of mind but comparatively little attention has been paid to the relationships between them This volume brings together philosophers from different specialisms to explore these relationships from three different angles First whether a theory of self awareness can contribute to a theory of emotion including how different aspects and kinds of self awareness are related to different emotions Second from the opposite direction whether research into emotions can help achieve a better understanding of self consciousness Finally the book considers how emotions are involved in the nature and development of selves Self and Affect is essential reading for all scholars and researchers of the philosophy of mind especially those focussing on emotions and self awareness     How We Use the Media Benjamin Krämer, Felix Frey, 2020-11-06 This volume considers strategies modalities and styles of media use and reception Dynamic changes in media technology and infrastructure have spurred important changes in media use Looking at these developments within the common conceptual framework of reception strategies modes and styles of media use and reception this volume is highly relevant against the background of the changing media environment When it comes to media use and reception communication research has mainly dealt with two much cited questions What do the media do with the people What do the people do with the media In comparison the discipline has devoted less attention to how the media are used the modalities patterns or configurations of the actual practices of media use The volume features original contributions both empirical and theoretical on the key concepts and approaches in the field covering old and new media and different types of media content Offering a comprehensive overview of existing research as well as promoting original findings and insights the volume will be of interest to communication researchers students and scholars     Empiricisms Barry Allen, 2021 Empiricisms is about the value of experience and experiments Why do we esteem them and what is their contribution to knowledge The work is unique in the detail with which it explains empiricism from its beginning in ancient medicine to its emergence as a philosophy of modern science It elucidates the ideas of the so called radical empiricists clarifying their relation to historical empiricism and explaining what is radical about them and develops a comparison between European empiricism and ideas and practice in traditional China Bringing China into the argument is an unexpected innovation and makes the work a model for comparative philosophy     **Schattenfroh** Michael Lentz, 2025-08-19 An intricate metaphysical ambitious psychogeography of the self that both disrupts and elevates the 21st century vision of the novel Our

narrator is held in complete darkness and isolation His endless thoughts are turned into the book we are reading Schattenfroh directed by none other than the narrator s mysterious jailer by the same name Undulating through explorations of Renaissance art the German reformation time defying esoterica the printing process in the 16th century Kabbalistic mysticism and beyond Schattenfroh is a remarkable book that in turn asks the remarkable of its readers Interruptions breaks and annotations both buoy and deceive and endless historical references literary allusions and wordplay construct a baroque encyclopedic quest Schattenfroh s publication in English marks a seminal moment in the history of the literary form

**Quasi-Things** Tonino Griffero, 2017-03-15 In this book Tonino Griffero introduces and analyzes an ontological category he terms quasi things These do not exist fully in the traditional sense as substances or events yet they powerfully act on us and on our states of mind He offers an original approach to the study of emotions regarding them not as inner states of the subject but as atmospheres that is as powers poured out into the lived space we inhabit Griffero first outlines the general and atmospheric characters of quasi things and then considers examples such as pain shame the gaze and twilight which he argues is responsible for penetrating and suggestive moods precisely because of its vagueness With frequent examples from literature and everyday life Quasi Things provides an accessible aesthetic and phenomenological account of feelings based on the paradigm of atmospheres

**Forms of Life and Subjectivity** Daniel Rueda Garrido, 2021-11-02 Forms of Life and Subjectivity Rethinking Sartre's Philosophy explores the fundamental question of why we act as we do Informed by an ontological and phenomenological approach and building mainly but not exclusively on the thought of Sartre Daniel Rueda Garrido considers the concept of a form of life as a term that bridges the gap between subjective identity and communities This first systematic ontology of forms of life seeks to understand why we act in certain ways and why we cling to certain identities such as nationalisms social movements cultural minorities racism or religion The answer as Rueda Garrido argues depends on an understanding of ourselves as forms of life that remains sensitive to the relationship between ontology and power between what we want to be and what we ought to be Structured in seven chapters Rueda Garrido's investigation yields illuminating and timely discussions of conversion the constitution of subjectivity as an intersubjective self the distinction between imitation and reproduction the relationship between freedom and facticity and the dialectical process by which two particular ways of being and acting enter into a situation of assimilation resistance as exemplified by capitalist and artistic forms of life This ambitious and original work will be of great interest to scholars and students of philosophy social sciences cultural studies psychology and anthropology Its wide ranging reflection on the human being and society will also appeal to the general reader of philosophy
