The Promise Of Tomorrow California Series 5:

CD-ROMs in Print ,2003 Natural Attachments Pollyanna Rhee,2025-05-08 A nuanced analysis takes a California oil spill as its point of departure to show how affluent homeowners pushed for an environmentalism that would protect not only the earth but also property and community norms A massive oil spill in the Pacific Ocean near Santa Barbara California in 1969 quickly became a landmark in the history of American environmentalism helping to inspire the creation of both the Environmental Protection Agency and Earth Day But what role did the history of Santa Barbara itself play in this As Pollyanna Rhee shows the city s past and demographics were essential to the portrayal of the oil spill as momentous Moreover well off and influential Santa Barbarans were positioned to domesticate the larger environmental movement by embodying the argument that individual homes and families not society as a whole needed protection from environmental abuses This soon would put environmental rhetoric and power to fundamentally conservative not radical ends **Diverse Perspectives on Aging in a Changing World** Gillian Joseph,2016-10-04 Focusing on under researched aspects of social economic and political change this volume offers fresh insights into aging older people and their families It combines an international and interdisciplinary approach Chapters explore the contexts in which family roles institutional practices public policies and social and cultural discourses evolve connecting analyses of aging issues and policy development with sound research practices as well as previously ignored gaps in professional practice Topics covered include politics and policy health and social care culture and migration urban and rural sociology gender studies technology and economics The book will be of particular interest to students and researchers in gerontology community development geography and population studies along with researchers and professionals in physiotherapy nursing and social work *NICEM Update of Nonbook Media* National Information Center for Educational Media,1978 Books in Print ,1991 Film & Video Finder ,1989 Resources in Education ,1993-10 *Speaking American* Zevi Gutfreund,2019-03-07 When Lyndon B Johnson signed the Bilingual Education Act of 1968 language learning became a touchstone in the emerging culture wars Nowhere was this more apparent than in Los Angeles where elected officials from both political parties had supported the legislation and where the most disruptive protests over it occurred The city with its diverse population of Latinos and Asian Americans is the ideal locus for Zevi Gutfreund s study of how language instruction informed the social construction of American citizenship Combining the history of language instruction school desegregation and civil rights activism as it unfolded in Japanese American and Mexican American communities in L A this timely book clarifies the critical and evolving role of language instruction in twentieth century American politics *Speaking American* reveals how for generations language instruction offered a forum for Angelino educators to articulate their responses to policies that racialized access to citizenship from the national origins immigration quotas of the Progressive Era through Congress s removal of race from these quotas in 1965 Meanwhile immigrant communities designed language experiments to counter efforts to limit their liberties Gutfreund s book

is the first to place the experiences of Mexican Americans and Japanese Americans side by side as they navigated debates over Americanization programs intercultural education school desegregation and bilingual education In the process the book shows these language experiments helped Angelino immigrants introduce competing concepts of citizenship that were tied to their actions and deeds rather than to the English language itself Complicating the usual top down approach to the history of racial politics in education Speaking American recognizes the ways in which immigrant and ethnic activists as well as white progressives and conservatives have been deeply invested in controlling public and private aspects of language instruction in Los Angeles The book brings compelling analytic depth and breadth to its examination of the social and political landscape in a city still at the epicenter of American immigration politics **Congressional Record** United States. Television at Work Kit Hughes,2020 Television has never been exclusive to the home In *Television at Work* Kit Hughes explores the forgotten history of how U S workplaces used television to secure industrial efficiency support corporate expansion and manage the hearts minds and bodies of twentieth century workers Challenging our longest held understandings of the medium Hughes positions television at the heart of a post Fordist reconfiguration of the American workplace revolving around dehumanized technological systems Among other things business and industry built private television networks to distribute programming created complex CCTV data retrieval systems encouraged the use of videotape for worker self evaluation used video cassettes for training distributed workforces and wired cantinas for employee entertainment In uncovering industrial television as a prolific sphere of media practice *Television at Work* reveals how labor arrangements and information architectures shaped by these uses of television were foundational to the rise of the digitally mediated corporation and to a globalizing economy **Spatializing Marcuse** Margath A. Walker,2022-07-25 This fresh

appraisal of philosopher Herbert Marcuse s work foregrounds the geographical aspects of one of the leading social and political theorists of the 20th century Margath A Walker considers how Marcusean philosophies might challenge the way we think about space and politics and create new sensibilities Applying them to contemporary geopolitics digital infrastructure and issues like resistance and immigration the book shows how social change has been stifled and how Marcuse s philosophies could provide the tools to overturn the status quo She demonstrates Marcuse s relevance to individuals and society and finds this important theorist of opposition can point the way to resisting oppressive forces within contemporary capitalism The Making of Twenty-First-Century Richmond Thad Williamson,Julian M. Hayter,Amy L. Howard,2024-12-02 Richmond Virginia took center stage globally in the summer of 2020 as an epicenter of antiracist protests in the wake of the police murder of George Floyd In a period of just a few weeks overwhelming public support grew for removing Richmond s

Confederate monuments Activists then transformed the remaining statue of Robert E Lee into a shrine to African American resolve to the Black Lives Matter movement and to Black victims of police brutality Coming to terms with Richmond's tortured racial history however is much more difficult than toppling symbols of white supremacy This book explores these dynamics via a multidisciplinary framework of historical research public policy analysis and political analysis showing the inner dynamics of politics and governance in Richmond The authors reveal why change and progress has often been so difficult to achieve and why that matters with a focus on three fundamental policy areas education economic development and housing The result is a comprehensive assessment of urban governance in a major southern city in the early twenty first century as well as an accounting of the policy and human consequences of both its limited successes and its recurring failures

Sunk Cost Jillian Berman,2025-04-08 Exposes the forgotten origins of the student loan system how politicians have attempted to fix it and the life altering damage borrowers face Student loan horror stories are a dime a dozen But students today are faced with a seemingly insurmountable paradox Research consistently shows that the clearest viable option to financial stability is a college degree But if and when Americans decide to pursue diplomas student loan payments quickly follow and even after securing full time employment many borrowers struggle to make ends meet for years In *Sunk Cost* journalist Jillian Berman explores how the nation's student loan program went from a well intentioned initiative aimed at helping low and middle income students afford college to one that traps borrowers in long term debt Berman interviewed dozens of borrowers and policymakers and dug into the archives to unearth the true causes of the student loan problem A couple of generations ago policy makers generously subsidized Americans college educations because they knew it would be advantageous for the entire country a more educated population meant better quality of life for all But today higher education is viewed as an individual goal so students and their families are expected to be on the hook for it themselves Berman explains how this enormous shift happened which industries benefit from it and what it means for college going Americans today She shares real life stories of college graduates who are being crushed under some of the harshest consequences of the student loan system These borrowers pursued higher education in hopes of a better life and yet some have been trapped in debt for decades making it difficult to put food on the table much less imagine a life beyond debt By connecting personal accounts to the policy history of student loans Berman makes clear that if American society continues to push students toward higher

education but fails to truly subsidize it the financial strain will become unbearable for all but the most privileged The current system is broken but Berman proposes that significant changes are possible and will require political will from state lawmakers and Congress along with a philosophical shift to tackle one of the largest consumer finance challenges of our time
