The Roots of Religion Roger Trigg, Justin L. Barrett, 2016-02-24 The cognitive science of religion is a new discipline that looks at the roots of religious belief in the cognitive architecture of the human mind The Roots of Religion deals with the philosophical and theological implications of the cognitive science of religion which grounds religious belief in human cognitive structures religious belief is natural in a way that even scientific thought is not Does this new discipline support religious belief undermine it or is it despite many claims perhaps eventually neutral This subject is of immense importance particularly given the rise of the new atheism Philosophers and theologians from North America UK and Australia explore the alleged conflict between truth claims and examine the roots of religion in human nature Is it less natural to be an atheist than to believe in God or gods On the other hand if we can explain theism psychologically have we explained it away Can it still claim any truth This book debates these and related issues [The Oxford Handbook of the Cognitive Science of Religion](#)

Faithful Science Alistair J. McKitterick, 2022-03-17 This thesis studies the impact of teaching intelligent design to evangelical students Science is often presented as a reason why some find sharing their faith difficult in a secular culture teaching the science of intelligent design enables Christians to initiate conversations and overcome obstacles with those whose worldview is more Darwinian and materialist The professional doctoral research employs both action research and practical theology Lin Norton's pedagogical action research provides the structure for the qualitative research and thematic analysis showing that students find learning about intelligent design empowering for evangelism Richard Osmer's model of practical theology enables an interdisciplinary reflection on how intelligent design challenges Western secular culture

Intelligent design is seen as the most integrative of all the different ways of relating science and theology. Theologically teaching intelligent design is like teaching a modern parable to contemporary society and just like the Gospel parables some respond with faith and some reject it. Evangelical students find learning about it both liberating and empowering in their ability to share their faith more confidently with others especially in schools and youth groups.

Scientific Models for Religious Knowledge Andrew Ralls Woodward, 2018-08-14. Most comparisons of science and religion are really comparisons of science and Christianity or science and Islam and so forth. In *Scientific Models for Religious Knowledge* the author aims to get outside typical polarized debates between traditional a priori theism and radical scientific naturalism. Instead a new science and religion compatibility system between a scientific study of religion and a religious epistemology is our new elusive problem. Moreover we shall look at a comparison and contrast of modern science with the simple deference of the human mind to the actions of culturally postulated superhuman agents. This book pays critical attention to the contributions of scholars in the philosophy of religion, the philosophy of science and the scientific study of religion. *Scientific Models for Religious Knowledge* is useful for readers looking to expand their learning in the philosophies of science and religion as these subjects are taught and analyzed in modern research universities.

God and the History of the Universe Jarvis Streeter, 2016-03-22. The popular belief that a scientific understanding of reality is incompatible with a Christian one is simply wrong. Some Christian understandings of reality do conflict with some scientific understandings. But a thoroughly rational Christian understanding of the origin and history of the universe will be informed by the best scientific theories and the facts founded on them. This

book weaves a narrative of the origin and history of the universe from the perspective of contemporary science with a Christian understanding of God and of God's role in the origin and history of the universe. At the center of this integrated narrative is the view that God, who is pure unbounded Love, is Creator; the zest for life in the universe comes from God, and God is the source of Truth, Beauty, and Goodness in the universe. God is amazed and delighted at what God and the world has created. God is saddened by ways creatures have fallen short of pure unbounded Love, Truth, Beauty, and Goodness, and God's pure unbounded Love keeps on trying to persuade all creatures toward Truth, Beauty, and Goodness. **Cosmic Prayer and Guided Transformation** Robert Govaerts, 2012-08-29. This book presents a realistic and thoroughly spiritual outlook upon the entire created reality. It lets us envisage that various created entities are participant in a relationship with God that becomes increasingly one of an intimate personal quality that is a relationship of love. It thus invites discernment that the universal reality is valuable in its own right and not only as a good for the use of humanity. Drawing mainly upon Scripture, ancient writers, especially Maximus the Confessor, as well as contemporary natural sciences, this book encourages the reader to perceive human salvation not as a lifting of humanity out of creation but as a transformation into God's presence in the midst of the wider created order. It shows that Christian faith at its best does not exclude the wider creation but provides us with insight and hope for a harmonious being in God that is inclusive of creation. It shows that Christian faith can be a resource that helps overcome the ecological crisis.

The Crucible of Religion Wojciech Maria Zalewski, 2012-02-13. Religion is commonly viewed through the lens of the world's religious traditions, stressing the differences and often the conflicts among them. The author of this book instead presents religion as a common and universal human phenomenon based deeply in a human nature shared by all. In this view, the underlining and unifying principle of religion is a particular affirmative attitude toward life which he presents as the Ultimate Value and as such the key cultural constituent and defining factor of all religion. This Ultimate Value finds its expressions in various civilizations and results in a variety of forms; these are what we know as the world's religious traditions. By analyzing the roles of both culture and civilization in their attitudes toward life, the author places religion beyond religious traditions and shows how the latter, regardless of whether they are theistic or atheistic, draw their principles from the former, mainly by promoting the Golden Rule in its applications.

Naturalism, Theism and the Cognitive Study of Religion Aku Visala, 2016-04-22. This book provides a critical philosophical analysis of the claim that contemporary cognitive approaches to religion undermine theistic beliefs. Recent scientific work into the evolution and cognition of religion has been driven by and interpreted in terms of a certain kind of philosophical and methodological naturalism. The book argues that such naturalism is not necessary for the cognitive study of religion and develops an alternative philosophical and methodological framework. This alternative framework opens the cognitive study of religion to theological and philosophical considerations and clarifies its relationship to other approaches to religious phenomena. This unique contribution to discussions regarding the philosophical and theological implications of the cognitive study of religion.

summarizes the so far fragmentary discussion exposes its underlying assumptions and develops a novel framework for further discussion

The Hebrew Bible and Philosophy of Religion Jaco Gericke, 2012-11-01 This study pioneers the use of philosophy of religion in the study of the Hebrew Bible After identifying the need for a legitimate philosophical approach to Israelite religion the volume traces the history of interdisciplinary relations and shows how descriptive varieties of philosophy of religion can aid the clarification of the Hebrew Bible's own metaphysical epistemological and moral assumptions Two new interpretative methodologies are developed and subsequently applied through an introduction to what the biblical texts took for granted about the nature of religious language the concept of deity the properties of Yhwh the existence of gods religious epistemology and the relation between religion and morality

Science and the Spirit James K. A. Smith, Amos Yong, 2010-08-26 What might be described as a Pentecostal worldview has become a powerful cultural phenomenon but it is often at odds with modernity and globalization Science and the Spirit confronts questions of spirituality in the face of contemporary science The essays in this

volume illustrate how Pentecostalism can usefully engage with technology and scientific discovery and consider what might be distinctive about a Pentecostal dialogue with the sciences The authors conclude that Pentecostals with their unique perspectives on spirituality can contribute new insights for a productive interaction between theology and science

Conjunctive Explanations in Science and Religion Diarmid A. Finnegan, David H. Glass, Mikael Leidenhag, David N. Livingstone, 2023-02-28 This book investigates the nature and relevance of conjunctive explanations in the context of science and religion It explores questions concerning how scientific and religious explanations for features of the world or phenomena within it relate to each other and whether they might work together in mutually enriching ways The chapters address topics including the relationship between Darwinian and teleological explanations non reductive explanations of mind and consciousness and explanations of Christian faith and religious experience while others explore theological and philosophical issues concerning the nature and feasibility of conjunctive explanations Overall the contributions help to provide conceptual clarity on how scientific and religious explanations might or might not work together conjunctively as well as exploring how these ideas relate to specific topics in science and religion more generally

Science and Faith within Reason Jaume Navarro, 2016-04-01 Scientists historians philosophers and theologians often engage in debates on the limitations and mutual interactions of their respective fields of study Serious discussions are often overshadowed by the mass produced popular and semi popular literature on science and religion as well as by the political agendas of many of the actors in these debates For some reducing religion and science to forms of social discourse is a possible way out from epistemological overlapping between them yet is there room for religious faith only when science dissolves into one form of social discourse The religion thus rescued would have neither rational legitimisation nor metaphysical validity but if both scientific and religious theories try to make absolute claims on all possible aspects of reality then conflict between them seems almost inevitable In this book leading authors in the field of science and religion including

William Carroll Steve Fuller Karl Giberson and Roger Trigg highlight the oft neglected and profound philosophical foundations that underlie some of the most frequent questions at the boundary between science and religion the reality of knowledge and the notions of creation life and design In tune with Mariano Artigas s work the authors emphasise that these are neither religious nor scientific but serious philosophical questions
