T. Jørgensen,Keri A. Kornelson,Karen L. Shuman,2011 The authors study the moments of equilibrium measures for iterated function systems IFSs and draw connections to operator theory Their main object of study is the infinite matrix which encodes all the moment data of a Borel measure on $\mathbb{R}^d$ or $\mathbb{C}$ To encode the salient features of a given IFS into precise moment data they establish an interdependence between IFS equilibrium measures the encoding of the sequence of moments of these measures into operators and a new correspondence between the IFS moments and this family of operators in Hilbert space For a given IFS the authors aim is to establish a functorial correspondence in such a way that the geometric transformations of the IFS turn into transformations of moment matrices or rather transformations of the operators that are associated with them **Eureka Math Algebra I Study Guide** Great Minds,2016-06-17 The Eureka Math curriculum provides detailed daily lessons and assessments to support teachers in
