Wildcraft Medicine Sheila Anne Wray, 2025-05-07 to build a solid foundation for understanding wild medicine and its practical use in our daily life we must begin at the source We must recognize the role ecology plays in the lives of these plants The medicine is more than the plant itself it is the ecosystem that supports it and the delicate interweaving of connections that make up the natural world For nature does nothing without purpose And thus begins the story of wildcraft medicine *Wildcraft medicine* as laid out in the pages of this book is more than a catalogue of medicinal plants natural cures and remedies *Wildcraft Medicine: In the Presence of Wonder* is a very personal exploration of the interrelationship between North American Indigenous plants and their ecosystem The author's life-long dedication and passion for the subject can be felt through her personal stories of working with the plants and her intimate understanding of their medicinal properties specifically toward first aid and pain management Written using the traditional storytelling style

for passing on knowledge the book incorporates anecdotal stories of time spent with the plants Indigenous teachings poems quotes and pictures to bring life to the written page and enhance the reader's understanding of the subject matter The book delves deep into the ethnobotany of Canada's northern rain forest and Boreal forest regions Included in the book are over 40 medicinal plant profiles and 25 recipes and remedies with practical advice on their application and usage Beyond the medicinal properties and home remedies laid out in this book the author highlights the importance of Indigenous teachings and traditional Earth stewardship environmental concerns and ecological responsibility Wildcraft Medicine In the Presence of Wonder is a love story The Running Sky Tim Dee, 2016-05-05 The Birds and the Bees series was designed for Vintage Classics by Timorous Beasties the Scottish studio famous for their designs inspired by the natural world Beginning in summer with clouds of breeding seabirds in Shetland and ending with nightjars like giant moths in the heart of England Tim Dee maps his encounters with birds over four decades of tracking them around the world He tells of familiar but near global birds like sparrows starlings and ravens and exotic species like electrically coloured hummingbirds in California and bee eaters in Africa Dee restores us to the primacy of looking and takes us outside again and again to marvel at what is flying above us Seehundgesang David Thomson, 2005
